ELECTRICAL CONNECTION SYSTEMS

ELECTRICAL CONNECTION

**Easy and quick to install:
less than a minute!
Lowest installation costs**

Can be installed in any weather condition

The AR-type electrical contact to the rail was developed by CEMBRE in 1988 to provide the **best solution to the needs of connecting conductors to the rail in both signalling and traction current return circuits.**

Since its introduction, it has made it possible to resolve and eliminate long-standing situations of malfunctions and disservices attributable to the various systems used up to then, defining **new levels of quality and safety to refer to.**

Thanks to the experience gained in the field of electrical connections and in the development of the hydraulic equipment necessary for their execution, CEMBRE has established the state of the art in rail connection.

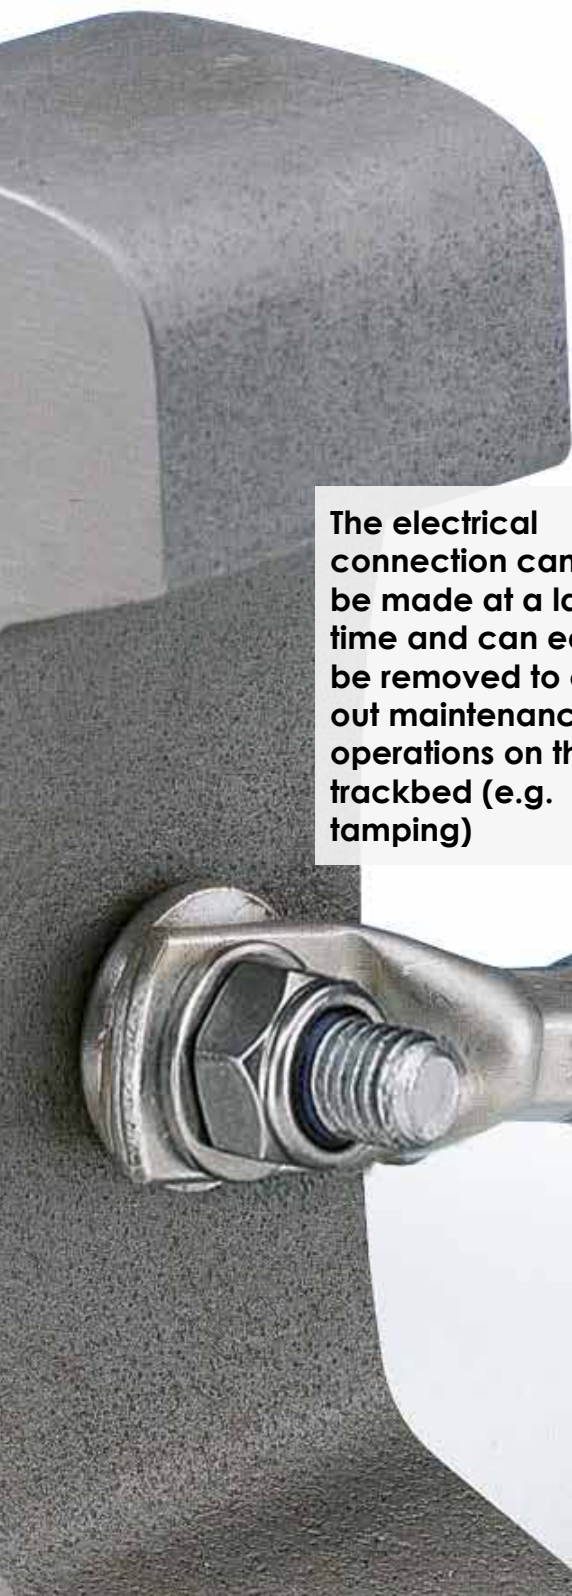

The AR electrical contact creates a very low resistance electrical interface between the rail web and the electrical connector to be associated with it, while ensuring **incomparable contact stability** in the most varied environmental conditions.

Tested and approved by major railway organizations, the CEMBRE AR-type electrical rail connection system is currently used on **high-speed and high-capacity lines** in over 60 countries, with more than 20 million pieces installed.

During installation, the lack of heat generation ensures the absence of structural alterations to the rail

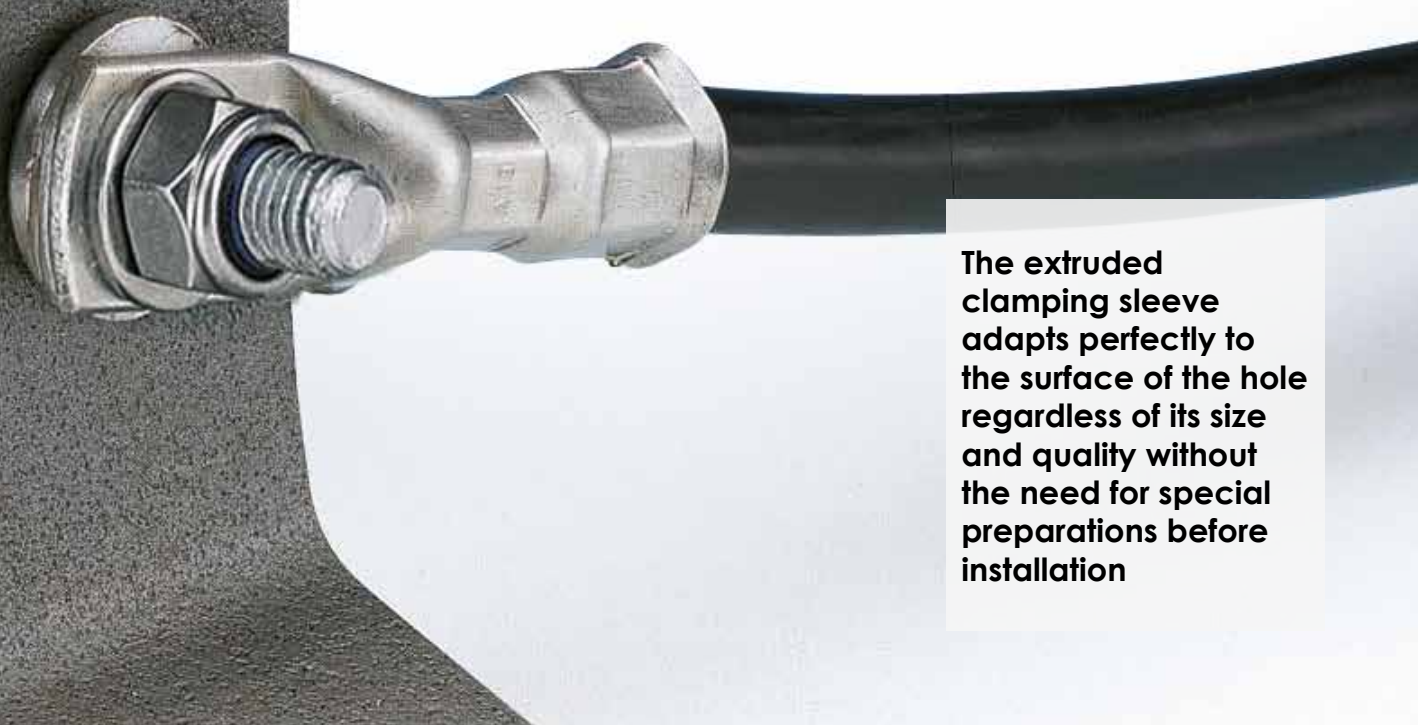

The flanged clamping sleeve can accommodate numerous types of power and signalling electrical connectors, specifically designed and approved to work with railway-specific cables

Available in the double version for installation on both sides

The electrical connection can also be made at a later time and can easily be removed to carry out maintenance operations on the trackbed (e.g. tamping)

The extruded clamping sleeve adapts perfectly to the surface of the hole regardless of its size and quality without the need for special preparations before installation

Very low resistance, constant over time, mechanical seal, protection from atmospheric agents

SIMPLE FACE

- traction return bonding
- continuity bonding
- ground bonding
- substation connection
- electrical drainage
- signal track circuit continuity
- signal track circuit connection

AR60D

FEATURES

rail web thickness	14 ÷ 16.5 mm
suitable for rail holes	Ø 19 mm

B1300TEP

TYPE	
 PLUG EU	B1300TEP
 PLUG UK	B1300TEPE
 PLUG USA	B1300TEPA

Hydraulic portable battery tool with the head directly connected to the body through a 900 mm flexible hose which allows the tool to be used also with other hydraulic heads, such as RHC131 for the compression of connectors and TC025 for cutting cables and lines.

Supplied with a gauge to be used both for checking the drilling of the rail web and for screwing the calibrated plunger to the head, and with a washer suitable for extruding double faces contacts.

length	250 mm
weight	441 gr

STBC12-300

1/2" Drive T bar with sliding handle

- Chromium-vanadium steel
- Satin chrome finish
- Standards: UNI ISO 3315 - DIN 3122

FEATURES

dimensions (LxH)	300 x 25 mm
head width	24 mm
weight	365 gr

TEMPORAIL

The Temporail system of connections and tooling provides a quick and reliable means to guarantee continuity of conductivity in rails during maintenance, repair and new installations.

Essential for maintaining return current connections, the Temporail system is also ideal for temporary signaling applications and earthing between the line and adjacent track side structures.

CEMBRE Temporail system applies to most of rail types with 125, 140 and 150 mm foot

For suitability verification please contact CEMBRE.

- Easy installation /removal using CEMBRE patented tool HT-TRC
- Safer working without the risks associated with alternative systems
- Connection without any drilling or welding
- No grinding or cleaning from previous operations
- High vibration resistance
- Accurate location on rail foot
- Re-usability due to controlled use of force

TYPE	COMPRISING
RTC1AL10-2000	2 m 120 mm ² insulated Aluminium flexible conductor cl.5 terminated both ends with Aluminium lugs and fixed with M10 Steel bolts and plain washers
RTC1AL10-V	TEMPORAIL clamp, supplied with screw and washer, to be used in combination with other conductors of different lengths already terminated with cable lugs.

HT-TRC

- Specifically designed to insert and extract CEMBRE Temporail clamp
- Works on all rail types with foot up to 150 mm
- Patented tool with safety feature protects against ejection of metal pieces during extraction

FEATURES

crimping force	50 kN
nominal pressure	700 bar
dimensions (LxLxH)	715 x 177 x 70 mm
weight	7.5 kg

Temporail requires no preliminary preparation to ensure good electrical connection as the clamp deeply scores the surface of the rail foot during installation.

CSF

At the transition between ground and rail foot, a cable must be correctly supported to avoid damaged, for example, during surface work. The CSF support is designed for simple fixing to the rail foot and requires no drilling.

CSF1 and **CSF2** consist of the following components:

- Cable support in 30% Glass fibre reinforced PA6.6
- 1 clips in Stainless Steel AISI302 for fixing on rail foot
- 2 cable ties in PA12 180x9 mm; black; Type 1618.90
- 2 Stainless Steel cable ties *GX200x4,5

* Fixing requires cable tie tool type 5527030079

TYPE	Ø MAX CABLE mm	RAIL FOOT WIDTH mm	RAIL
CSF1	30	150	60E1 (UIC 60)
CSF2	30	125	49E1 (S49) 54E3 (S54)

SFK

Designed for the secure and durable fixing of cable max. Ø 22 mm to the rail foot without the need for tools.

TYPE	Ø MAX CABLE mm	RAIL FOOT WIDTH mm	RAIL
SFK125	22	125	49E1 (S49); 54E3(S54)
SFK150	22	150	60E1 (UIC60); R65

TRACK MAINTENANCE SOLUTIONS

THE BEST SOLUTION FOR RAIL DRILLING

The **LD** family of drills, manufactured by CEMBRE for over 40 years, is the solution for safe and correct rail drilling in a wide variety of railway applications.

Ergonomics, attention to detail, and tool-free set-up, enable fast, precise and quality operations.

The robustness and materials that distinguish CEMBRE machines significantly extend tool life and reduce maintenance requirements.

The special mechanical transmission makes it possible to achieve the best weight/power trade-off.

All this results in time savings without neglecting any safety-related details.

Lightweight, to facilitate transport to the work area

Compact, to accommodate use in very confined spaces

High-efficiency oil-bath gear transmission

Adjustable feed lever to best suit the height of the operator or application

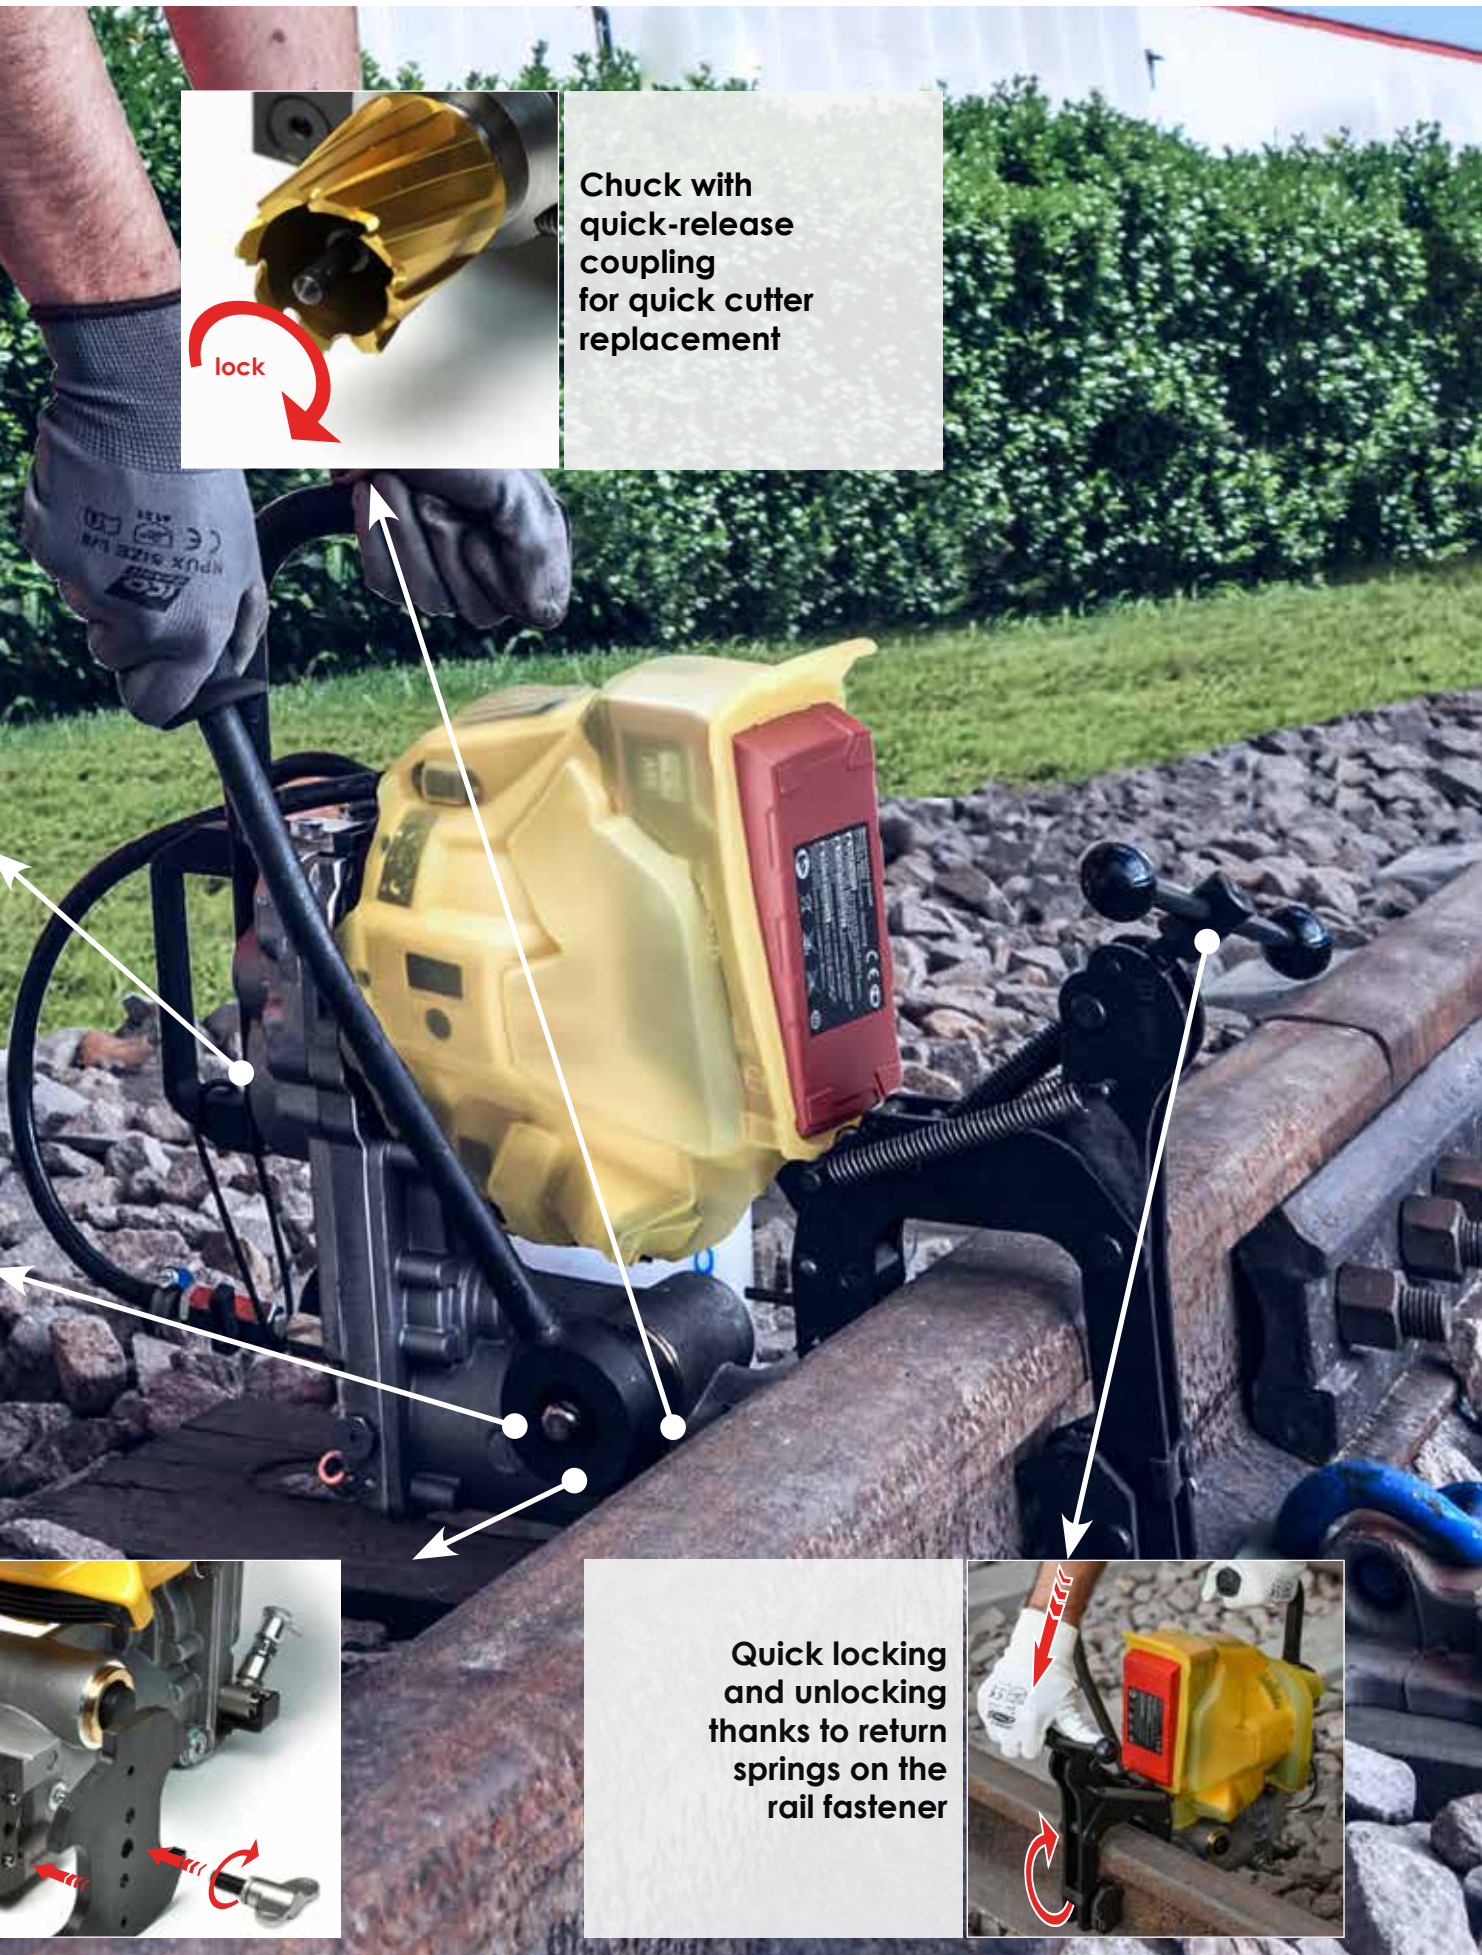

Double-profile jig with quick-release coupling to reduce the accessories and tools you need to carry with you

Chuck with quick-release coupling for quick cutter replacement

Quick locking and unlocking thanks to return springs on the rail fastener

LD-16B-RP

LD is the best solution for rail drilling in all respects: no emission of harmful gases, low noise and vibration impact, high battery efficiency and very high execution speed.

These features make it ideal for working in closed environments, such as tunnels and underground lines, and for night work.

The smart power-reading system acts as a drilling assistant by telling the operator, via the colour of the LED, how to modulate the thrust on the drive lever.

The battery is compatible with the **SD-19BR-RP** sleeper drill and **B70M-P36** pump.

- Complete drilling in less than 60 seconds
- 40 x 19mm holes with one charge
- Battery charging time 60 minutes
- Ingress Protection IP44M
- 36V CEMBRE system
- Brushless motor
- Electronic drill assistant with coloured LED

LD-1P-ECO

Thanks to the power of the KAWASAKI TJ045 motor and the high efficiency ratio of the mechanical transmission, the LD-1P-ECO is the version of the CEMBRE 2-stroke drill that is always ready for use.

- KAWASAKI TJ045 2-stroke motor
- Automatic air opening system on the carburettor
- high power, immediately available
- can be used in all positions

FEATURES	
drilling range	Ø 7 ÷ 40 mm
with special spiral bits on rail up to 45 mm thick	Ø 7 ÷ 27.5 mm
with broach cutters on rail up to 50 mm thick	Ø 13 ÷ 40 mm
engine

LD-41P

The HONDA GX035 4-stroke power drill is the green petrol-powered solution. The efficiency of the mechanical transmission enables full power to be transmitted to the cutter shaft. The HONDA GX035 motor can be used in all positions thanks to its special engine oil draining system.

- HONDA GX035 4-stroke motor
- Can be used in all positions
- Limited environmental impact
- Easy motor starting thanks to the automatic decompression system

FEATURES

drilling range	Ø 7 ÷ 40 mm
with special spiral bits on rail up to 45 mm thick	Ø 7 ÷ 27,5 mm
with broach cutters on rail up to 50 mm thick	Ø 13 ÷ 40 mm

DBG-F2

Over rail clamp for clamping drilling machine to rail web and track fittings. Complete with four terminations:

- **TDB1** for switch blades and confined spaces
- **TDB3** for re-drilling existing holes in rails for subsequent application of electrical connections and for additional special applications
- **TDB6** for UIC60 rail

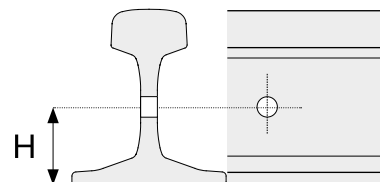

MPAF

Templates for positioning rail drills **MPAF** on rails and contragons.

Easy to install thanks to a design that facilitates correct positioning on the drill. They interface with the **SPA** positioning brackets.

MPAF

TYPE	RAIL	H mm
MPAF-46UNI	46E4 (ex 46 UNI)	62,5

*supplied with LD drills

DBG-LF2

Over rail clamp for clamping the drill to girder rails. Use the **DBG-LF2** device in place of the DBG-F2 supplied with the drilling machine, for positioning the machine on girder rails. Complete with the termination **TDB7**.

It also allows the correct securing of the drill:

- in a horizontal position for drilling holes for mechanical and electrification joints
- in a vertical position for drilling drainage holes

**MPAF**

Positioning jigs on groove rails for drilling at a fixed height on both sides of the rail:

TYPE	RAIL	H mm
MPAF-35G	54G1, 54G2, 55G1, 55G2 (35GP)	59
MPAF-NP4AM	62R1, 62R2 (NP4AM)	73
MPAF-RI55NK-56.5	RI55	56,5
MPAF-RI60N	RI60N	73

CYL long cutters must be used with these jigs.

**GUIDE BITS AND ADAPTERS**

Accessories required for drilling groove rails.

GUIDE BIT	ACCESSORIES NEEDED
CYL	guide bit PPL1, PPL2*
CY	adapter PPDF2 + guide bit PFA1
PE	adapter PFAD2 for U33 rail

*supplied with LD drills

MPAS

This template allows the correct vertical positioning to drill girder rails for water discharge.

TYPE	RAIL
MPAS-35G-GP	54G1, 54G2, 55G1, 55G2 (35GP)
MPAS-41GP13	41GP13

MRF-DB-UIC60-V

Positioning clamp for mechanical joints.
Allows easy positioning thanks to the marking of the centre line, for drilling 4 holes at predetermined distances.

MRF-DB-UIC60-N

Positioning clamp for mechanical joints.
Allows easy positioning thanks to the marking of the centre line, for drilling 4 holes at predetermined distances.

MRFT-SR-A

Positioning jig for axle counter gauge fixing holes, with hole centre distances of 148 mm.
Rail foot clamping allows the jig to remain in place during train passage.
Compatible with CEMBRE MPAF and MPSR jigs.
Check with CEMBRE which one is most suitable for your application.

MRF-SR-SFA + SR-SKI + SR

Positioning clamp for drilling holes for the installation of wheel sensors.

This clamp is installed on the rail head and can be used in 3 modes, which correspond to 3 different sensor models:

- **MODE 1:** 2 holes at a distance of 145 mm
- **MODE 2:** 2 holes at a distance of 270 mm
- **MODE 3:** 3 holes at a distance of 148 mm

SR templates kit have to be used with the support plates **SR-SKI** or **SR-SKI-C** which must be ordered separately.

The **SR** kits include 2 side panels and screws for attachment to the **SR-SKI** base.

CY

The new **CY** broach cutter family is made by CEMBRE and has been specifically designed for optimum use with CEMBRE rail drilling machines. CY type cutters are suitable for drilling Steel rail quality grades 700-900-1100 (UIC 860.0).

Fitted with a Quick push/turn shank, the CY family has an original cutting geometry and an additional coating of Titanium Nitride (TiN) with high hardness and low friction to improve both the cut surface finish and corrosion resistance, while staying sharper for longer. With these characteristics, the performance of CEMBRE CY broach cutters easily surpasses that of the previous A and A-L types, by providing:

- more holes per single broach cutter
- drilling time definitively lower
- better cut surface finish

*supplied with LD drills

VAL-P24

Plastic carrying case for rail drills. Accommodates the complete drill together with the clamping device and accessories.

FEATURES

dimensions (LxWxH)	754 x 458.5 x 484.5 mm
weight	9.2 kg

SR5000/CS-P24

Support for coolant unit **SR5000**.

VAL-P24-CS

Case with wheels and folding handle.

FEATURES

dimensions (LxWxH)	754 x 458.5 x 484.5 mm
weight	9.2 kg

VAL-LD

Metal case for holding both the drill fitted with the **DBG-F2** clamping device and the **DBSN** clamping device and the **VAL-MPA-E** accessory case.

FEATURES

dimensions (LxWxH)	595 x 345 x 467 mm
--------------------	--------------------

VAL-LD-L

Metal case for holding the drill fitted with the **DBG-LF2** clamping device (for groove rails).

FEATURES

dimensions (LxWxH)	653 x 366 x 455 mm
--------------------	--------------------

VAL-MPA

Suitable for storage of drilling templates, cutters and accessories

FEATURES

dimensions (LxWxH)	390 x 355 x 52 mm
--------------------	-------------------

VASCO5000-3LT

Lubrocooler concentrate 3 litre.

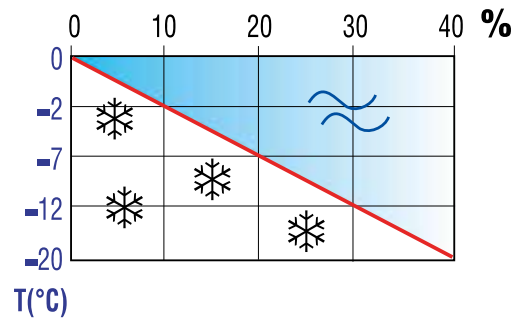

Biodegradable product of vegetable origin, to be watered down in the percentage 95% water, 5% oil, will provide a white colour mixture very effective for drilling operations with no heating of the rail or the drilling machine.

V11

Antifreeze concentrate 3 litres.

Added to the lubro cooling mixture with the right percentage will maintain the lubrocooling mixture fluid (see table) in negative temperature conditions.

MSC

Tool for collecting metallic swarf following drilling operations.

SK9038

Countersink conical flaring for unalloyed steels, with ergonomic handle in two component material.

- Ø max. 38 mm
- 90° head angle
- 6-edged head

THE ONLY AUTOMATIC CUTTING-OFF MACHINE IN THE WORLD!

ROBOKATTA® enables automatic rail cutting thanks to the **innovative oscillation system integrated in the arm**.

Once started, the cut-off machine moves autonomously until it switches off automatically at the end of the rail cut.

The electronic control system stops the machine in the event of an overload and notifies the operator to clean/replace the filters and drive belt.

The radio-controlled stopping device increases the **safety** of this cut-off machine .

With this product, CEMBRE confirms its focus on **risk reduction to protect rail maintenance workers**.

CEMBRE RDS cut-off machines are the only ones that accept both 350 mm and 400 mm abrasive cutting discs thanks to their innovative variable speed drive system.

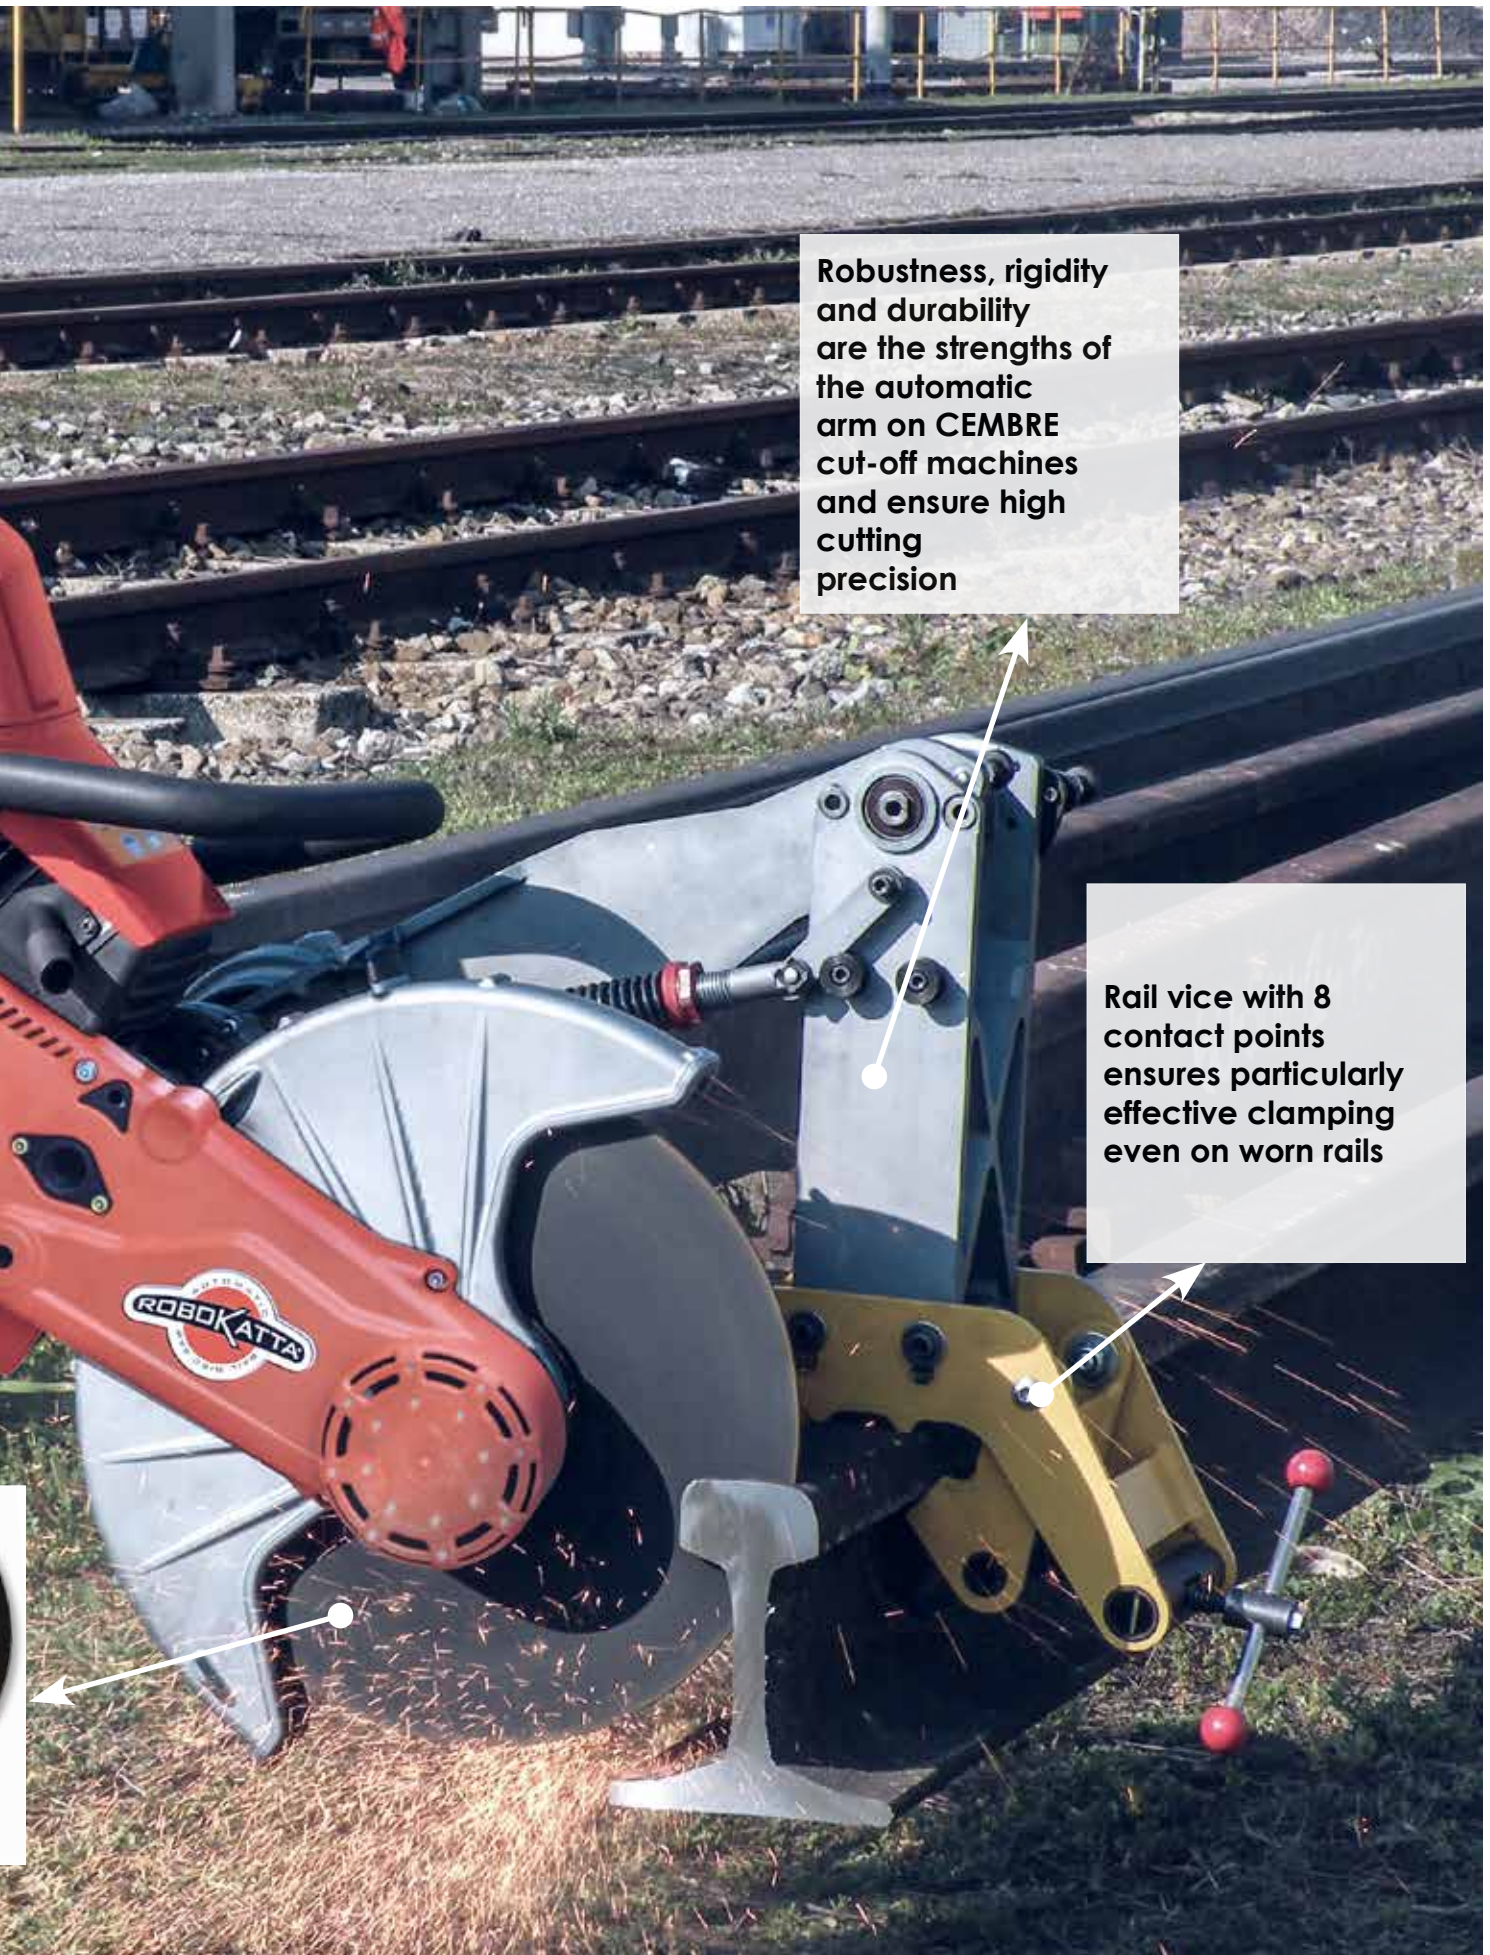

Dual air filtration system to limit the ingress of micro-dust and keep the engine running efficiently at all times

Speed control device that optimises disk performance for lower power consumption

Compatible with 350 mm and 400 mm high-performance discs with 1" and 7/8" centring

Robustness, rigidity and durability are the strengths of the automatic arm on CEMBRE cut-off machines and ensure high cutting precision

Rail vice with 8 contact points ensures particularly effective clamping even on worn rails

RDS-14PN-AA

- For VIGNOLE rails
- Equipped with an accelerator lock to enable automatic cutting
- Automatic remote shut-down by radio control at the end of the cut
- Variable speed drive and pulley for automatic speed setting during cutting to optimise cutting time and disc consumption
- Automatic arm with mechanical transmission for correct oscillation and load management on the rail
- Compatible with **SA-RDS** manual arm
- Available in the CUT-OFF version with automatic arm **RDSC-14PN-AA**

**FEATURES RDS-14PN**

cutting disc	Ø 350/400 mm
disc support shaft	Ø 25.4 mm

C-REX

C-REX

For ROBOKATTA® best performance use CEMBRE **C-REX** cutting discs. Fibreglass reinforced abrasive disc specifically designed for cutting all types of rail in railway applications.

CENTERIGN SHAFT DIAMETER	Ø DISC	TYPE
25,4 mm (1")	355 mm (14")	CRDL4381
	406 mm (16")	CRDL6401
22,2 mm (7/8")	355 mm (14")	CRDL4387
	406 mm (16")	CRDL6407

Consult us for ROBOKATTA® version equipped with 22.2 mm (7/8") diameter disc support shaft

SA-RDS

Support arm for cutting rails in manual mode for VIGNOLES rails. Consisting of two strong and rigid aluminium connecting rods, it allows cutting precision and longevity. The vice is equipped with 8 points to allow firm clamping to the rail even when the rail head is worn. Support arm for cutting rails in manual mode

SAY1-RDS

Support arm for cutting rails in manual mode for GROOVE rails. Consisting of two strong and rigid aluminium connecting rods, it allows cutting precision and longevity. The vice is equipped with 8 points to allow firm clamping to the rail even when the rail head is worn. Support arm for cutting rails in manual mode

KY1-RDS

Replacement vice for **AA-RDS** and **SA-RDS** arms, suitable for fixing on groove rails.

SSR1

Stabiliser suitable for safely cutting short lengths of rail or stabilising the end of rails that are not supported during cutting.

VAL-RDS

Robust wooden case for storage of the CEMBRE rail saw **RDS-14PN** or **RDS-20PN**.

To facilitate transport and protect the rail saw, support arms **SA-RDS** or **SAY1-RDS** and accessories from accidental knocks and dirt.

dimensions (LxWxH)	1.000x390x550 mm
weight	12 kg

VAL-AA-RDS

Robust wooden case for storage of the automatic arms **AA-RDS** or **AAY1-RDS**.

dimensions (LxWxH)	910x434x428 mm
weight	7.2 kg

VERTICAL AND HORIZONTAL WORK

Dual accelerator for convenient use in both vertical and horizontal positions

Reverse gear with easy engagement

CEMBRE **NR** impact wrenches feature an ergonomic handle that balances the weight of the tool on the operator's arms, either horizontally or vertically.

The power generated by the motor is efficiently converted by the reduction gear to provide high torque to the ram.

Particularly suitable for all **railway applications requiring fast screwing/unscrewing** of mechanical parts, even those damaged by atmospheric agents.

Shock absorber bearings between handlebars and machine and between motor and machine

Rollbar for motor protection in case of accidental falls

Extremely compact oil-bath gearbox for efficiency and mechanical strength

High-inertia ram capable of releasing any mechanical grip

NR-25B

The CEMBRE **NR-25B** impact wrench expands the range of **battery-operated equipment for permanent way applications**, thus offering a valid alternative to petrol-driven machines.

An **extremely practical and eco-friendly choice**, specifically designed for railway applications.

It can be used both in portable mode and in combination with the **CS-EU** support trolley with the aid of the specific interface KIT.

The double charger allows you to charge both batteries at the same time in 120 minutes.

With **2700 Nm of torque** and **dual drive** for vertical and horizontal use, the NR-25B is the most powerful and versatile impact wrench in the industry.

The **IP44M rain proofing** and **vibration damping** system make it a safe solution that guarantees high performance.

TYPE

NR-11P

Equipped with a powerful and easy-to-maintain 2-stroke motor. The shape of the tank makes the best use of space, ensuring a higher than standard capacity and, consequently, range. The accelerator is equipped with a safety system so that it can only be used if it is firmly gripped. The decompression valve allows the motor to be started easily. The ram unit is immersed in shock-absorbing grease which protects against impact wear, while the lip seal perfectly retains the grease inside the body. Equipped with 5-level power reducer.

SCREWING/UNSCREWING

FEATURES

engine	2 cycles, forced-air cooled, single cylinder	
displacement	55 cc	
fuel tank capacity	1.2 l	
fuel mixture ratio	Synthetic oil 1:50	
revolution (idle)	2800 U/min ± 200	
revolution (loaded, impact)	7000 U/min	
revolution (non loaded, max)	11500 U/min

NR-13E

Equipped with electric motor. The accelerator is equipped with a safety system so that it can only be used if it is firmly gripped. A filter is mounted on the power cable to protect the machine and the operator from possible electrical shocks caused by disturbances in the mains to which it is connected.

The ram unit is immersed in shock-absorbing grease which protects against impact wear, while the lip seal perfectly retains the grease inside the body.

**FEATURES**

motor	single phase electric	
supply voltage	220 ÷ 230 V / 50 Hz	
power rating	3 kW

KCS-NR

KCS-NR interface kit for **vertical** use of the impact wrenches **NR-11P & NR-13E** with support trolley **CS-EU**.

KCS-NR25

KCS-NR25 interface kit for **vertical** use of the battery impact wrench **NR-25B** with support trolley **CS-EU**.

KHOR-NR

KCS-NR interface kit for **horizontal** use of the impact wrenches **NR-11P & NR-13E** with support trolley **CS-EU**.

KHOR-NR25

KCS-NR25 interface kit for **horizontal** use of the battery impact wrench **NR-25B** with support trolley **CS-EU**.

VAL-NR

Metal case for storage of the impact wrenches **NR-11P & NR-13E** and **VAL-P20** accessories box.

**VAL-NR-25B**

Metal case for storage of the battery impact wrench **NR-25B** and **VAL-P20** accessories box.

**VAL-P20**

Plastic box for storage of sockets and accessories.

**027-NR**

Protection cover for impact wrench.

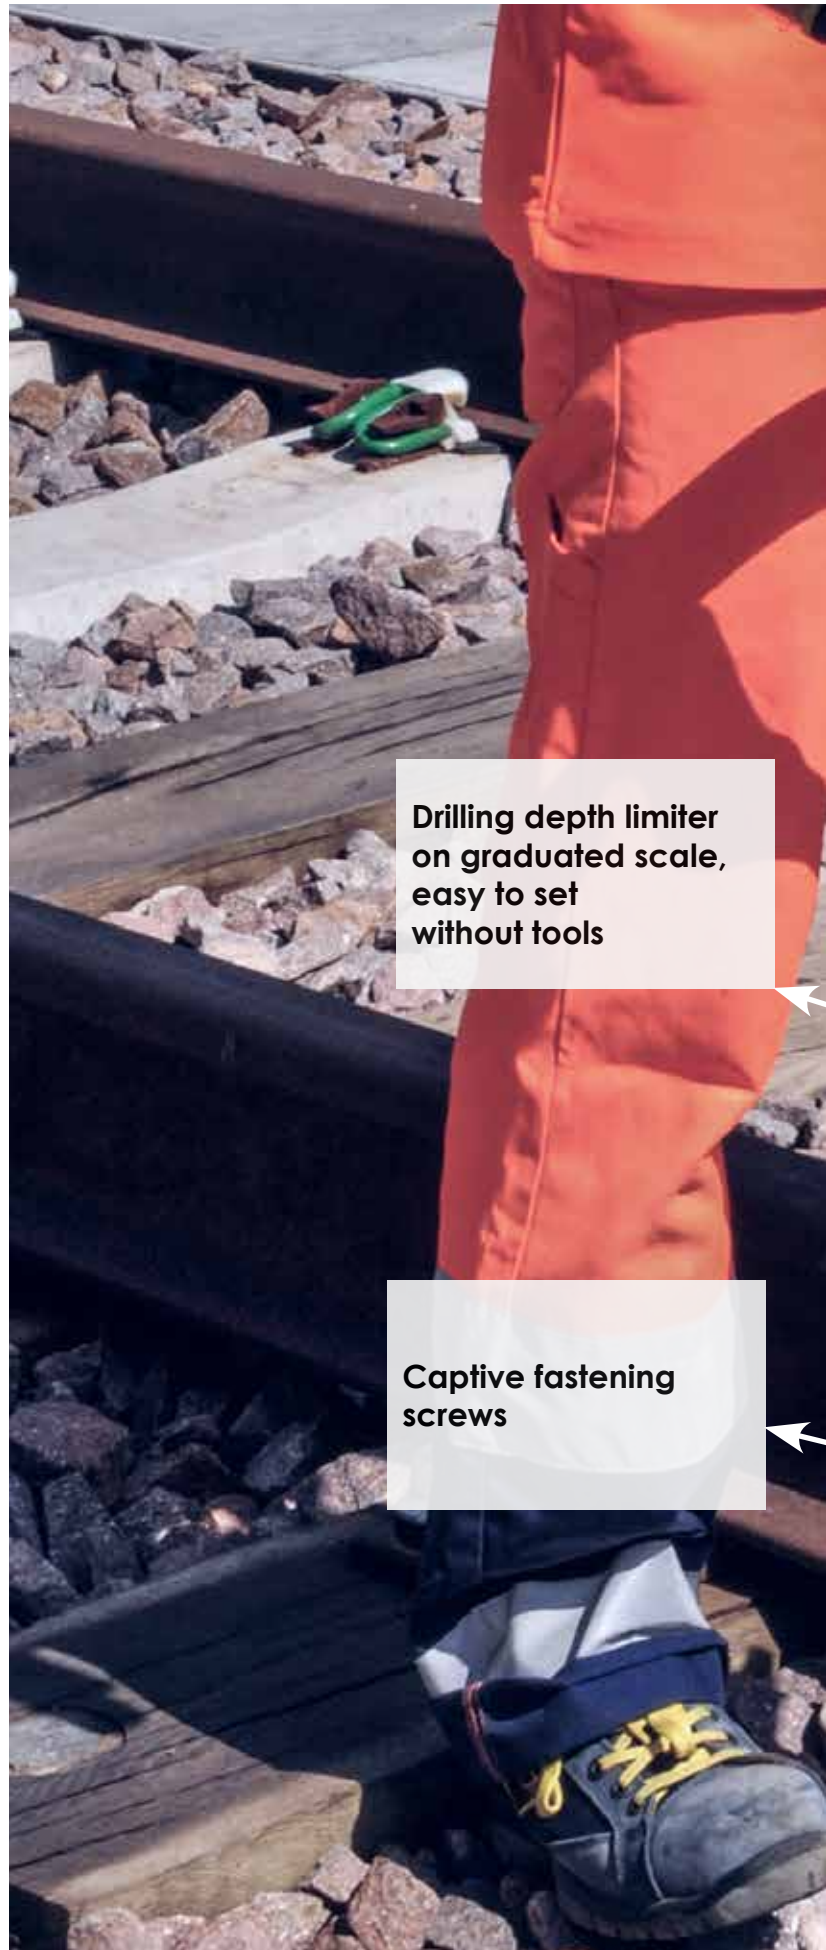

SLEEPER DRILL

CEMBRE **SD** sleeper drills feature an ergonomic and balanced handle, which ensures a firm, yet comfortable and balanced grip during use and transport.

The quick bit release allows the operator to instantly disconnect the tool from the sleeper in an emergency.

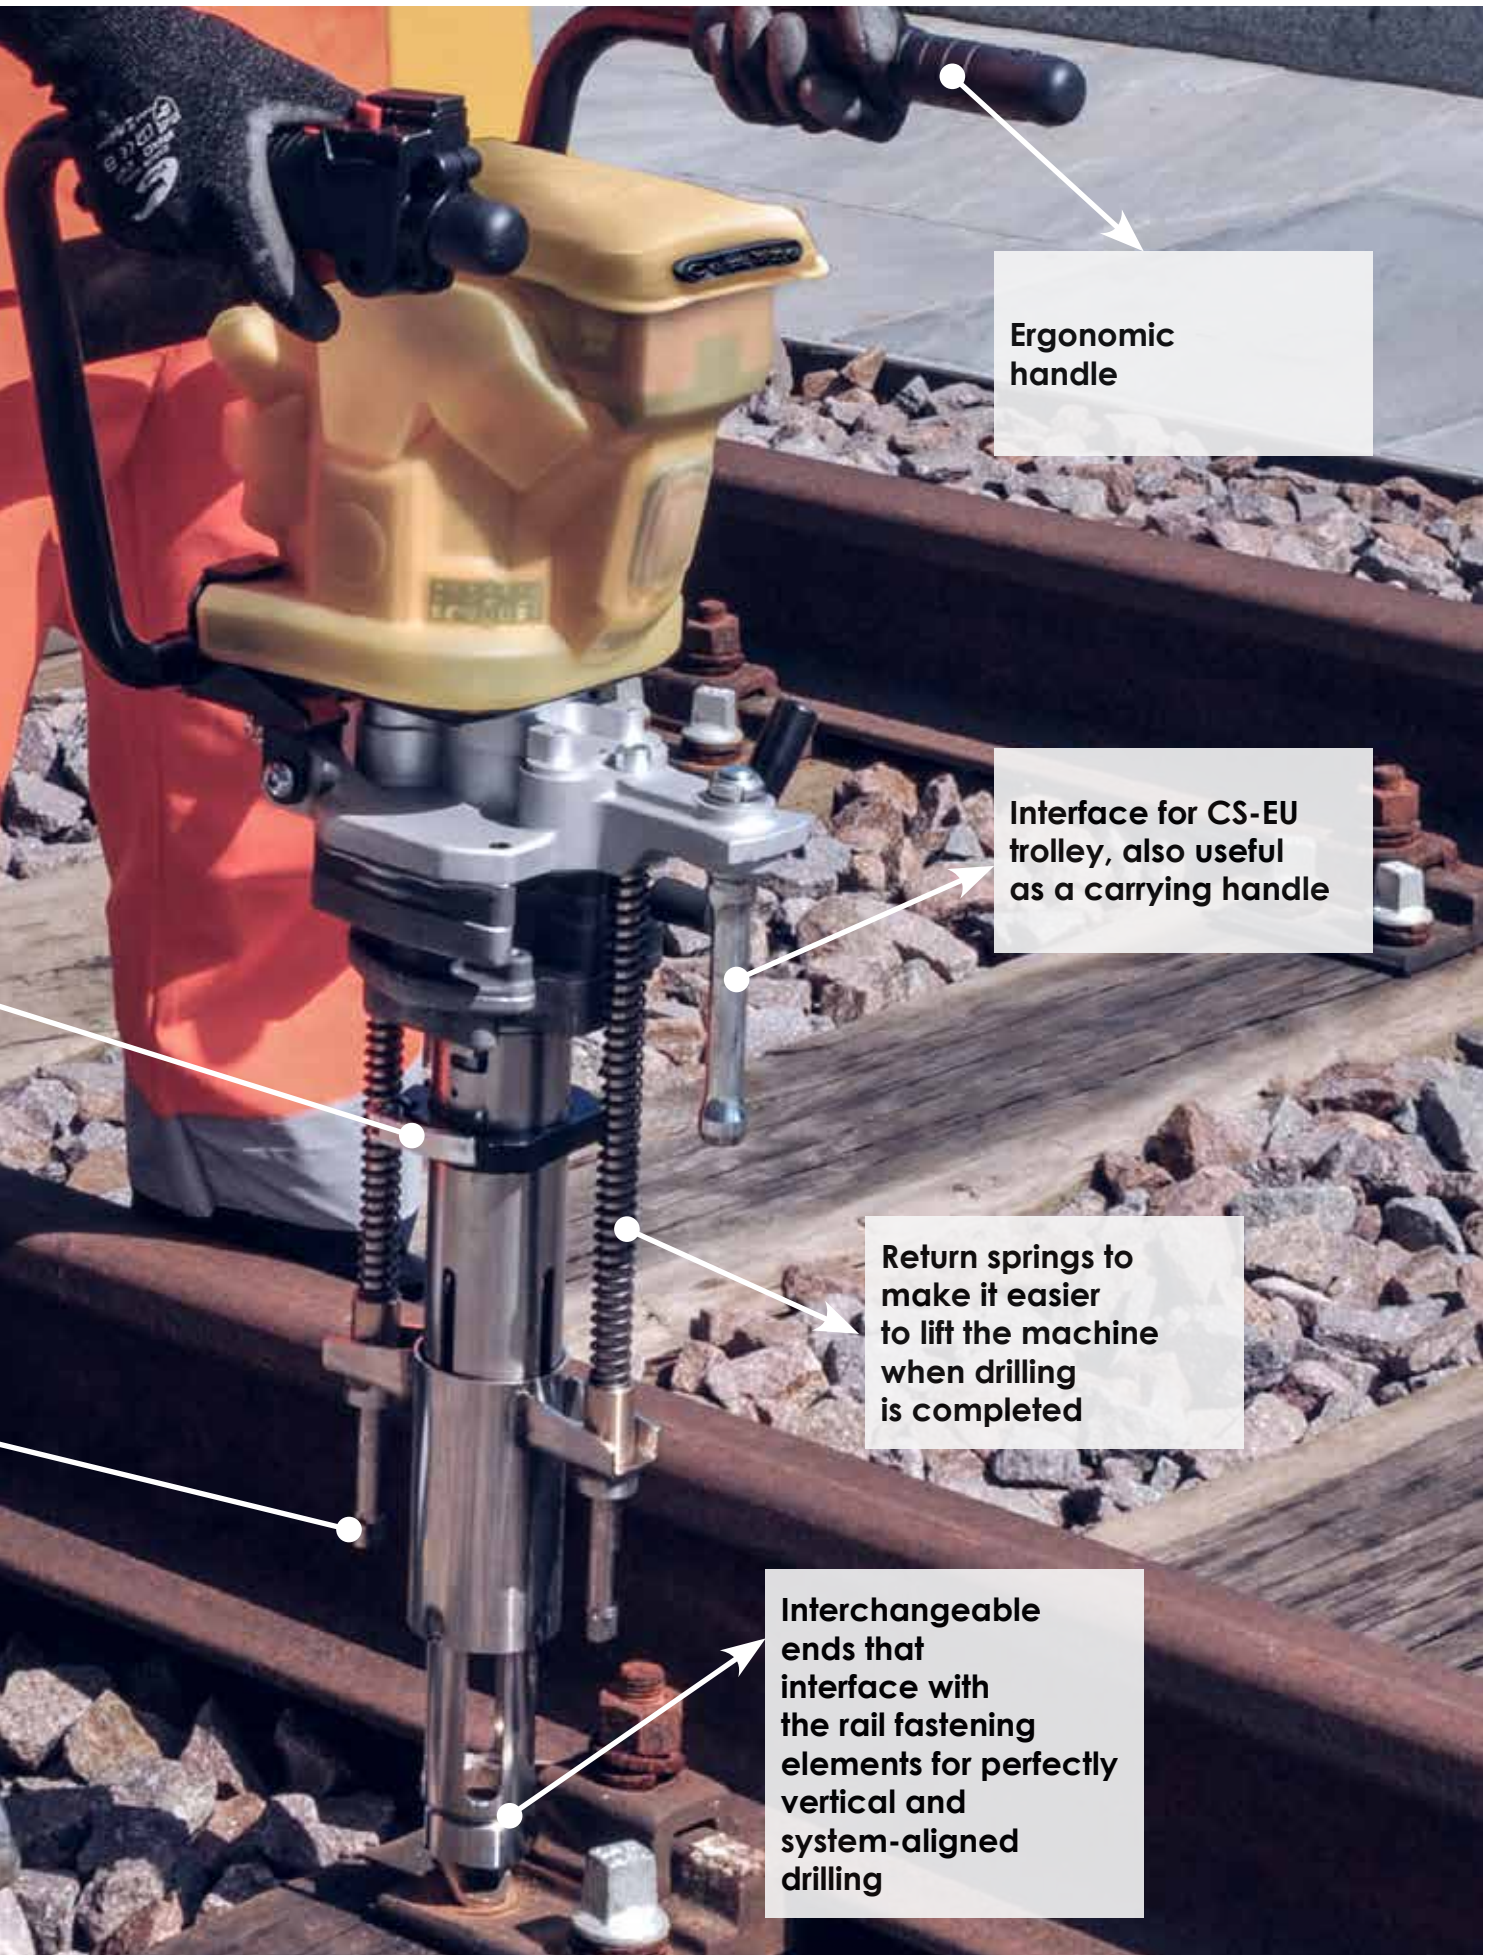

The bit is fully protected, providing maximum safety for the operator.

SD sleeper drills are suitable for even intensive drilling of various wood materials, such as spruce and tropical woods, commonly used in the railway industry.

Drilling depth limiter on graduated scale, easy to set without tools

Captive fastening screws

Ergonomic handle

Interface for CS-EU trolley, also useful as a carrying handle

Return springs to make it easier to lift the machine when drilling is completed

Interchangeable ends that interface with the rail fastening elements for perfectly vertical and system-aligned drilling

SD-19BR-RP

Designed to have the best power-to-weight ratio when drilling wooden sleepers, the **SD-19BR-RP** has a low acoustic impact, low vibration level and, above all, no harmful gas emissions, making it ideal for working in closed environments (tunnels, under-ground lines, ...) and for night work.

The electronic reverse function makes it easy to release the bit if it should accidentally become jammed during drilling.

Electronic power control prevents overloads, optimises consumption and preserves the battery by extending its life. The battery is compatible with the **LD-16B-RP** drill and the **B70M-P36** pump.

- 100 holes with one battery
- Electronic reverse function
- 60 minutes to fully charge the battery
- Brushless motor
- 2 batteries supplied
- Ingress Protection IP44
- CEMBRE 36V system
- Compatible with **CS-EU** trolley

TYPE	
 PLUG EU	SD-19BR-RP

DRILL BITS

PV drill bits are designed to achieve high performance in combination with the CEMBRE sleeper drill.

The sharpness of the cutting edge and the shape of the threaded lead nut ensure efficiency and range for the machines and encourage the drill to advance during drilling.

Ø mm	TYPE
10	PV100
13	PV130
14	PV140
16	PV160
17	PV170
18	PV180
19	PV190
20	PV200
21	PV210
22	PV220
25	PV250
28	PV280

MND1

Optional chuck with quick coupling and automatic drill bit locking.

Interchangeable with the standard **MND** chuck, it is suited to fit DIS. FS 7874 bits, with coupling shank Ø16 mm and length 325 mm according to: CAT. 744 / PROG. 490 - 491 - 492 - 493

PRM-UN

Compatible with CEMBRE sleeper drills engine and battery powered

PRM-U/TPM-N

Adaptor suitable to use new TPM-N on PRM-U previous version.

TPMN

Ends compatible with SD sleeper drills equipped with standard PRM-UN protection.
The left-handed thread prevents unscrewing of the end cap during use and transport.

* long type

VAL-P6

Plastic case (214 x 382 mm) for storing the drill bits and standard accessories supplied with the machine.
This case can be stored inside the drilling machine case **VAL-SD**.

026-SD

Protection cover for sleeper drilling machine.

CS-EU

Designed to provide maximum support for operators when drilling sleepers and/or tightening or loosening mechanical elements such as tree-nails or bolts.

The **CS-EU** trolley enables the safe support of **NR** impact wrenches and **SD** sleeper drills during use or transport.

The insulated wheels do not interfere with the track circuits while their shape allows the trolley to run on turnouts and switches without hindrance.

The adjustable gas spring allows very precise adjustment of the support arm.

Lightweight, can be dismantled into 4 pieces, easily transportable and suitable for moving other equipment on the **PSCS-EU** support surface.

- Self-braking wheels
- Equipped with braked wheels
- Adjustable gas spring
- 360° rotating arm
- Can be dismantled into 4 pieces

FEATURES

dimensions	
length	1561 mm
minimum height	568 mm
maximum height	900 mm
weight	
without counterweight carriage	18 kg
of counterweight carriage	8.5 kg
bar	3.5 kg

FLANGED WHEEL

allowing the trolley to operate on level crossing.

BALANCING CARRIAGE

with two dedicated housing:

- for impact wrench sockets and drill bits of the sleeper drilling machine
- to counterbalance any extensions

KLE

Extensions allow the impact wrench or sleeper drilling machine to be used in areas further away from the rail-mounted trolley. Extensions must be used with **KPC-CS1** counterweight on balancing carriage to maintain stability and operator safety.

**EXTENSIONS**

KLE6-CS	length 15 cm
KLE32-CS	length 32 cm
KLE43-CS	length 58.5 cm

PSCS-EU

support base

**KPC-CS1**

Weights kit. is positioned on the counterweight carriage to balance the weight of drills or impact wrench mounted on the support trolley (we recommend the use of these when the extensions are mounted).

RHTD270

Hydraulic nut cutting head for cutting hexagonal nuts from 16 mm to 27 mm; equipped with a quick coupling for connection to a pump with 700 bar operating pressure. The head is very useful in Electric Traction re-placement work as it can be easily used on the following contact line parts:

- normal I 621 isolator bracket for load-bearing cables
- attachments for registration arms to the bracket
- attachment of the bracket to the pole
- attachment of the tie rod to the bracket
- u-bolt clamps for track ropes and shaped wire

PCM-2P

The **PCM-2P** machine allows the easy insertion or removal of two **Pandrol E-CLIP*** clips simultaneously, thanks to the powerful Honda 4-stroke motor that feeds the hydraulic pump. The machine consists of four components that can be easily assembled without tools and is therefore always ready for use.

Consists of:

- pump unit
- clamp unit
- trolley
- balancing rod

Only the operator, by means of the mechanical control, can operate the machine cycle, thus guaranteeing completely controlled and safe work during all operational phases.

Thanks to the hydraulic system that can be split and shared between versions, the machine is also compatible with the Pandrol E-CLIP* clip removal clamp unit.

- Can be put together without tools
- Intuitive and quick adjustments
- HONDA GX200 4-stroke motor

FEATURES

application range	suitable for insertion/extraction of the PANDROL E-CLIP* on standard gauge sleepers (1435 mm)
developed force (single clamp)	29.000 N
engine HONDA GX200 UT-SMCR OH	4 cycles, overhead valve, single cylinder
displacement	196 cm ³
power	4.3 kw
fuel	unleaded regular grade petrol
dimensions (LxWxH)	1400 x 850 x 1900 mm

CBL02-W

Head torch ideal for any indoor or outdoor activity requiring localised lighting and freedom of action, the **CBL02-W** head torch is equipped with a touch sensor allowing operation even whilst wearing gloves. The light intensity can be modulated via the dimmer function helping to preserve battery life. The **CBL02-W** is a versatile head torch adjustable by means of an elastic band to fit work helmets of various sizes. Supplied with USB charging cable and charger.

FEATURES

CBL07

Portable spotlight for large work environments. The diffused light emitted by the CBL07 spotlight enables the illumination of large areas. Light, practical and sturdy, this spotlight is quick to install. The power bank function allows small devices to be charged via the USB output, useful for emergency situations. Supplied with charger.

OVERHEAD CATENARY SOLUTIONS

FTGW

The innovative connector is unique in that it allows a new contact wire to be attached and, at the same time, joined to a worn one.

This is possible thanks to the specific profile of the connector, which avoids the time-consuming and difficult manual operation of tapering the new wire, providing the train pantograph with a uniform and seamless running area. The use of these connectors also minimises working times.

In addition to laboratory tests, operational trials have shown that the connector made with **FTGW** performs well both on lines up to 180 km/h and on lines at lower speeds with high current draw (lines on slopes).

B500-TFC

The **B500-TFC** is a cordless tool that can be operated with one hand. Suitable for cutting profiled contact wires, on electrified traction systems. The tool in combination with **MFC** series cutting dies ensures a perfectly perpendicular wire cut without deforming the profile, allowing for correct and easy installation of full traction connectors.

- balanced tool for greater control
- Head rotates 180° for ease of operation in confined spaces.
- Fitted with a maximum pressure valve.
- Automatic return of dies after completion of the cut.
- Automatic return can be stopped at any time to ease positioning.
- Extremely quiet, minimal vibration.
- Durable moulded body offering high resistance to wear and damage in all operating conditions.
- New Li-Ion 18V 2Ah High Power battery.
- The battery is equipped with LED indicators to show the remaining battery life at any time by pressing the adjacent button.
- Supplied in a robust plastic case to accommodate the tool and all the accessories.
- Operating temperature: -15 to +50°C

FOR THE CORRECT CHOICE OF CUTTING DIES TO USE, SEE PAGE 77

MFC

A wide range of dies is available to cut most profiled contact wires or stranded conductors. In combination with the TFC series of tools, these cutting dies ensure a perfectly perpendicular wire cut without deforming the profile, allowing for correct and easy installation of full traction connectors.

AD-GW

The **AD-GW** device speeds up Electric Traction technicians' in-line work when applying full traction connectors to the contact wire (wire joint clamps) and eliminates the "snags" associated with this type of work.

It is supplied complete with the **HC-GW** device for adjusting grooved contact wire.

SALE SETUP

device	AD-GW
adjusting device	HC-GW

MSGW

The mechanical straightening device for profiled contact wires allows the easy and continuous straightening of the most common sizes of wires for example: 100 - 120 - 150 mm².

FEATURES

dimensions (LxWxH)	431 x 234 x 290 mm
weight	6.8 kg

ON REQUEST

bracket for fixing to pole	KA-MSGW
----------------------------	----------------

MSGW-3D

Straightening die sets to be used with **ECW-H3D** hydraulic head. By a combination of the calibrated profile of these dies and the high compression force of the press head, good results in correcting localised misshaping of the wire may be obtained, with only one operation. The head can be connected to a hydraulic pump with a working pressure of 700 bar max.

ELECTRICAL CONNECTORS AND CABLE GLANDS

RKY BKY GKY

'KY' type terminals are designed to offer improved mechanical and electrical integrity under heavy-duty application. This is achieved via a Copper sleeve located between the Copper barrel and Polyamide insulation of the terminal. Then, during crimping, the insulation of the conductor is integrated around the crimp due to the Copper sleeve being deformed around it to maintain the level of 'grip' required in applications subject to continuous mechanical vibrations (e.g: mobile plant, vehicles, moving components). The operating temperature range is - 20 to + 105°C (Surge + 110°C).

PKD

The PK.. range of end sleeves is manufactured from Tin plated electrolytic Copper with a purity greater than 99.9%. Designed and developed to reinforce fine wire strands when terminating a cable into a connector block. The PKD series of insulated end sleeves comply with specification DIN 46228/4. The operating temperature range is - 20 to + 115°C (Surge + 130°C).

JOINTS

Shells manufactured from transparent synthetic material which allows a visual check of the connections before and after casting.

The halves of the shell are joined by snap closures which avoid further fixing or sealing.

Shells are left on after casting to provide additional protection against mechanical abrasion, chemical agents and severe weather conditions.

⁽¹⁾ Internal dimension of the shell

⁽²⁾ Indicative cable sections are approximate and concern only harmonised, PVC or Rubber insulated cables at a working voltage of 0,6/1 kV

A-M series lugs are manufactured from electrolytic Copper tube with a purity greater than 99.9%.

The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength to resist vibration and pull out.

The presence of an inspection hole facilitates full insertion of the conductor, whilst the barrel length has been designed to allow easy and accurate positioning of the dies during the crimping operation.

Lugs are electrolytically Tin plated to avoid oxidation.

2A-M

The **2A-M** series cable lugs are designed for heavy duty, for grounding structures and equipment both indoors and outdoors and for medium voltage applications up to 35 kV. 2A-M series terminals are made from high purity Copper tube with a purity greater than 99.9%, and are annealed. They feature a double length barrel for enhanced electrical and mechanical performance in heavy duty applications. The absence of an inspection hole prevents the entry of water or moisture into the crimped joint making these terminals suitable for outdoor applications. The terminals are electrolytically Tin plated to prevent atmospheric corrosion.

2A-2M

The **2A-2M** series cable lugs are designed for heavy duty, for grounding structures and equipment both indoors and outdoors and for medium voltage applications up to 35 kV. 2A-2M series terminals are made from high purity Copper tube with a purity greater than 99.9%, and are annealed. They feature a double length barrel for enhanced electrical and mechanical performance in heavy duty applications. The double hole fixing ensures greater mechanical stability even in the presence of electrodynamic stresses. The absence of an inspection hole prevents the entry of water or moisture into the crimped joint making these terminals suitable for outdoor applications. The terminals are electrolytically Tin plated to prevent atmospheric corrosion.

HYDRAULIC CRIMPING AND CUTTING TOOLS

B450ND-BV

TYPE	
 PLUG EU	B450ND-BV
 PLUG UK	B450ND-BVE
 PLUG 230	B450ND-BVA
 PLUG 230	B450ND-BVT

B450ND-BV hand-held cordless tools, characterised by a "Bilinear" mechanical design.

B450ND-BV is suitable for crimping electrical connectors onto conductor cross sections up to 150 mm² and uses the die sets common to all CEMBRE 45 kN tools and heads.

Equipped with Li-Ion 18.0V - 2.0Ah rechargeable high capacity batteries.

The battery is equipped with LED indicators to show the remaining battery life at any time by pressing the adjacent button.

Weight and balance have been reconfigured to yield improvements in handling and convenience.

Quieter operation, illumination of the working area via LED lights and a minimum of vibration enhance the tool's practicality.

It is also a feature that the operating data is stored on a memory card for transfer to PC by USB interface (SMARTOOL technology).

FEATURES

crimping force	50 kN
dimensions (LxWxH)	364 x 81 x 136 mm
weight	2.6 kg

SALE SETUP

tool	B450ND-BV
batteries x2	CB1820L
battery charger	ASC55-EU
USB cable	✓
shoulder strap	✓
plastic case	VAL-P22

B500ND

TYPE	
 PLUG EU	B500ND
 PLUG UK	B500NDE
 PLUG 230	B500NDA
 PLUG 230	B500NDT

B500ND hand-held cordless tools, characterised by a "Bilinear" mechanical design. Equipped with a Smart Release system which automatically retracts the ram at the end of the operating cycle.

B500ND is suitable for crimping electrical connectors onto conductor cross sections up to 300 mm² and uses the die sets common to all CEMBRE 50kN tools and heads.

FEATURES

crimping force	60 kN
dimensions (LxWxH)	396 x 81 x 136 mm
weight	3.15 kg

SALE SETUP

tool	B500ND
batteries x2	CB1820L
battery charger	ASC55-EU
USB cable	✓
shoulder strap	✓
plastic case	VAL-P22

B500

TYPE	
 PLUG EU	B500
 PLUG UK	B500E
 PLUG 230	B500A
 PLUG 230	B500T

The **B500** is suitable for a wide range of connectors up to 300 mm² using die sets common to the CEMBRE 50 kN tooling range.

Equipped with Li-Ion 18.0V - 5.2Ah rechargeable high capacity batteries.

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	63 kN
dimensions (LxWxH)	300 x 83 x 343 mm
weight	4.2 kg

SALE SETUP

tool	B500
batteries x2	CB1852L
battery charger	ASC55-EU
USB cable	✓
shoulder strap	✓
plastic case	VAL-P38

B600CND

B600CND is suitable for crimping electrical connectors onto conductor cross sections up to 300 mm².

Equipped with Li-Ion 18.0V - 2.0Ah rechargeable high capacity batteries. Head rotate by 180° for ease of operation in confined spaces.

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before.

FEATURES

crimping force	60 kN
dimensions (LxWxH)	398 x 81 x 136 mm
weight	3.15 kg

SALE SETUP

tool	B600CND
batteries x2	CB1820L
battery charger	ASC55-EU
USB cable	✓

plastic case	VAL-P63

B600C

The **B600C** is a portable cordless tools that are characterized by even better functionality. The B600C is suitable for crimping cable lugs and connectors up to 300 mm².

Equipped with Li-Ion 18.0V - 5.2Ah rechargeable high capacity batteries.

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	60 kN
dimensions (LxWxH)	300 x 83 x 350 mm
weight	4.5 kg

SALE SETUP

tool	B600C
batteries x2	CB1852L
battery charger	ASC55-EU
USB cable	✓
shoulder strap	✓
plastic case	VAL-P39

B600

TYPE	
 PLUG EU	B600
 PLUG UK	B600E
 PLUG 220	B600A

The **B600** is suitable for installing crimp type electrical connectors on copper cables up to 240 mm².

Die set common to 50 kN CEMBRE tools (e.g. HT51, RH50) can be used in this tool only with Spring code 6522051, purchased separately. Equipped with Li-Ion 18.0V - 5.2Ah rechargeable high capacity batteries.

The OLED display provides essential real time tool operating information data including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	63 kN
dimensions (LxWxH)	347 x 83 x 344 mm
weight	5.1 kg

SALE SETUP

tool	B600

B1300-C

TYPE	
 PLUG EU	B1300-C
 PLUG UK	B1300-CE
 PLUG CA	B1300-CA
 PLUG CT	B1300-CT

B1300-C is suitable for a wide range of connectors up to 400 mm² using die sets common to the CEMBRE 130 kN tooling range.

Equipped with Li-Ion 18.0V - 5.2Ah rechargeable high capacity batteries.

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	132 kN
jaw opening	25 mm
dimensions (LxWxH)	406 x 102.5 x 239 mm
weight	6.8 kg

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	132 kN
jaw opening	42 mm
dimensions (LxWxH)	395 x 83 x 372 mm
weight	8.1 kg

SALE SETUP

tool	B1350L-C
batteries x2	CB1852L
battery charger	ASC55-EU
USB cable	✓
shoulder strap	✓
plastic case	VAL-P39

B1300-UC

TYPE	
 PLUG EU	B1300-UC
 PLUG UK	B1300-UCE
 PLUG USA	B1300-UCA
 PLUG AU	B1300-UCT

B1300-UC will accept the accessories for performing the "Deep Stepped Indent" system of crimping on Aluminium cables. The B1300-UC will accept all semi-circular slotted dies, common to most 12 tons tools (U dies).

Equipped with Li-Ion 18.0V - 5.2Ah rechargeable high capacity batteries.

The OLED display provides essential real time operating data, including:

- generated crimping force thus verifying accordance with best practice
- battery charge status
- general operating information
- the number of work cycles completed and remaining before recommended maintenance.

FEATURES

crimping force	132 kN
dimensions (LxWxH)	423 x 102.5 x 239 mm
weight	6.5 kg

plastic case	VAL-P39

HT45 HT45-E

Lightweight and compact, this tool is ideal for the compression of connectors for general applications.

Having the benefit of spring loaded handles, the dies can be advanced using only one hand; therefore leaving the other hand free to position the connector.

For ease of operation and comfort of the operator, the tool head can be fully rotated through 180 degrees.

The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure releasing system can easily be operated at any stage of the compression.

FEATURES

crimping force	50 kN
dimensions (LxH)	380 x 130 mm
weight	2.7 kg

HT51 HT51D

Two speed hydraulic tool, lightweight and compact, this tool is ideal for working in confined spaces.

Having the benefit of spring loaded handles, the dies can be advanced using only one hand; therefore leaving the other hand free to position the connector.

For ease of operation and comfort of the operator, the tool head can be fully rotated through 180 degrees. The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure release system can easily be operated at any stage of the compression.

FEATURES HT51

crimping force	50 kN
dimensions (LxH)	380 x 130 mm
weight	2.7 kg

SALE SETUP HT51

tool	HT51
plastic case	VAL-P1

HT51D tool is more powerful than HT51 equipped with a pressure relief valve which intervenes when the maximum pressure of 725 bar is reached.

FEATURES HT51D

crimping force	64 kN
dimensions (LxH)	380 x 130 mm
weight	2.7 kg

SALE SETUP HT51D

tool	HT51D
plastic case	VAL-P1

HT120

This lightweight and self contained tool will accept the semi-circular slotted dies, common to most 130 kN tools. It is particularly suitable for installing crimp type electrical connectors for overhead line applications. The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping. For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees. The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and a pressure release system can easily be operated at any stage of the compression.

FEATURES

crimping force	120 kN
jaw opening	25 mm
dimensions (LxH)	488 x 138 mm
weight	5.7 kg

SALE SETUP

tool	HT120
plastic case	VAL-P3

HT131-C

This new model, self contained, robust and sturdy, will accept all semi-circular slotted dies, common to most 130 kN tools. The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping. For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees. The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and the pressure release system can easily be operated at any stage of compression.

FEATURES

crimping force	130 kN
jaw opening	25 mm
dimensions (LxH)	473 x 144 mm
weight	5.5 kg

SALE SETUP

tool	HT131-C
plastic case	VAL-P3

HT131LN-C

This new model, self contained, robust and sturdy, will accept all semi-circular slotted dies, common to most 130 kN tools. The tool features a double speed action: a fast advancing speed for rapid approach of the dies to the connector and a slower more powerful speed for crimping. For ease of operation and comfort of the operator the tool head can be fully rotated through 180 degrees. The built-in safety valve will by-pass the oil supply when the maximum pressure is reached, and the pressure release system can easily be operated at any stage of compression.

FEATURES

crimping force	130 kN
jaw opening	42 mm
dimensions (LxH)	538 x 144 mm
weight	7 kg

SALE SETUP

tool	HT131LN-C
plastic case	VAL-P3

HT131-UC

This robust and self contained tool will accept the accessories for performing the "Deep Stepped Indent" system of crimping on Aluminium cables.

This tool will also accept the semi-circular slotted dies, common to most 130 kN tools.

HT131-UC performance features are the same as those of HT131-C.

FEATURES

crimping force	130 kN
dimensions (LxH)	488 x 149 mm
weight	5.4 kg

SALE SETUP

tool	HT131-UC
plastic case	VAL-P3

RH50

Hydraulic presshead complete with quick automatic coupler for connection to a hydraulic pump with a working pressure of 700 bar max.

RH50 is suitable for installing the same range of connectors as HT51. **HT51**.

FEATURES

crimping force	50 kN
max operating pressure	700 bar
dimensions (LxH)	195 x 75 mm
weight	1.6 kg

SALE SETUP

head	RH50
plastic case	VAL-P1

ON REQUEST

canvas bag	CVB-007
------------	----------------

RH60C

Hydraulic presshead complete with quick automatic coupler for connection to a hydraulic pump with a working pressure of 700 bar max. RH60C is suitable for installing the same range of connectors as B600C and uses the same dies.

FEATURES

crimping force	60 kN
max operating pressure	700 bar
dimensions (LxH)	216 x 91 mm
weight	1.8 kg

SALE SETUP

head	RH60C
plastic case	VAL-P26

ON REQUEST

canvas bag	CVB-007
------------	----------------

RH61

A hydraulic presshead complete with a quick automatic coupler for connection to a hydraulic pump with a max operating pressure of 700 bar.

The **RH61** head develops a crimping force of 60 kN and is suitable for installing crimp type electrical connectors on copper cables up to 240 mm².

The RH 61 head uses the same dies as **B600**.

For the full range of dies available please contact CEMBRE.

It is also possible to use dies from other manufacturers type Gr.1.

FEATURES

crimping force	60 kN
max operating pressure	700 bar
dimensions (LxH)	345 x 90.5 mm
weight	2.75 kg

B-TC250ND

TYPE	
 PLUG EU	B-TC250ND
 PLUG UK	B-TC250NDE
 PLUG AU	B-TC250NDT

B-TC250ND is specifically designed to cut Copper, Aldrey, Aluminium, Aluminium-Steel cables and Steel ropes, Aluminium and Steel rods having a max overall diameter of 25 mm.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. New Li-Ion 18.0V - 2.0Ah batteries offer a higher capacity, while greater cutting speed and cutting force result from a revitalised hydraulic system with double speed action.

The battery is equipped with led indicators that indicate the remaining battery life at any time by pressing the adjacent button.

Quieter operation, illumination of the working area via LED lights and a minimum of vibration enhance the tool's practicality.

Two batteries and charger included.

Same charger of all our tools.

Operating temperature: -15 to +50 ° C

FEATURES

max cutting Ø mm	25 mm
dimensions (LxWxH)	401 x 81 x 136 mm
weight	3.5 kg

HT-TC026

Hand operated hydraulic tool specifically designed to cut Copper, Aldrey, Aluminium, Aluminium-Steel cables and Steel ropes, Aluminium and Steel rods having a max overall diameter of 25 mm.

The tool features a double speed action: a fast advancing speed for rapid approach of the blades to the cable and a slower more powerful speed for cutting.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The head can rotate through 180 degrees, to enable the operator to work in the most comfortable position, and can easily be opened to allow the cutting of running cables.

HT-TC026 features an automatic safety valve to bypass oil when reaching maximum pressure; a pressure release device can also be operated at any stage of operation.

FEATURES

max cutting Ø mm	25 mm
dimensions (LxH)	382 x 129 mm
weight	3.2 kg

SALE SETUP

tool	HT-TC026
canvas bag	CVB-001

HT-TC026Y

Hand operated hydraulic tool specifically designed to cut Copper, Aldrey, Aluminium, Aluminium-Steel cables, stay wire and Steel ropes having a max overall diameter of 25 mm and Steel earthing rod up to 16 mm. The tool features a double speed action.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life.

The head can rotate through 180 degrees, to enable the operator to work in the most comfortable position, and can easily be opened to allow the cutting of running cables.

HT-TC026Y features an automatic safety valve to bypass oil when reaching maximum pressure; a pressure release device can also be operated at any stage of operation.

HT-TC051Y

Hand operated hydraulic tool specifically designed to cut Copper, Aluminium, Aluminium-Steel cables (ACSR) having a max overall diameter of 50 mm.

The **HT-TC051Y** is provided with a two stage hydraulic system, which advances the blades quickly to the cable. This proven system saves operator time and effort.

The HT-TC051Y is provided with an automatic safety valve to bypass oil when reaching max pressure.

This means safety to the operator and protection to the blades.

The blades are manufactured from high strength special Steel, heat treated to ensure a long service life. The shape of the blades provides a "clean" cut. The head can be opened to allow cutting of running cables and ropes.

The head rotates 90 degrees allowing the operator to perform the cut in the most comfortable position.

TC050Y

Hydraulic cutting head complete with quick automatic coupler for connection to a hydraulic pump with a working pressure of 700 bar max.

TC050Y features the same cutting capability as **HT-TC051Y**.

FEATURES

max cutting Ø mm	50 mm
max operating pressure	700 bar
dimensions (LxH)	331 x 112 mm
weight	3.3 kg

B70M-P36

TYPE	
 PLUG EU	B70M-P36
 PLUG UK	B70M-P36E
 PLUG Schuko	B70M-P36A
 PLUG US	B70M-P36T

Pumps **B70M-P36** are powered by an all new 36.0V 6.2Ah Li-Ion high capacity rechargeable battery providing independence and portability.

Extremely compact and suitable for a wide range of applications. The new design and ergonomic weight distribution allows the pump to be easily handled during use. Quieter operation, and the absence of vibrations ensure maximum operator comfort. The CEMBRE logo acts as an indicator by changing colour to provide the operator with instantaneous visual confirmation of the pumps status, such as; pump ready, pump in use, end of cycle, cycle error, anomaly, maintenance required.

FEATURES

max operating pressure	700 bar
dimensions (LxWxH)	405 x 161 x 327 mm
weight	10 kg

B68M-P18 is a lightweight high capacity pump equipped with an innovative remote control suitable for a wide range of applications.

Li-Ion 18V 5.2 Ah batteries offer a high capacity, while improved operating speed results from a revitalised hydraulic system with double speed action.

A maximum pressure sensor assures greater precision and repeatability of the pressure cycle, while a security valve doubles the provision for operator safety.

 PLUG US	B1300PLT

Portable electro-hydraulic pump **B1300PL** is battery operated for independent use. Having the inherent strengths of the CEMBRE 18V tool range the B1300PL is a compact, lightweight pump suitable for a wide range of applications. Li-Ion 18 V 5.2 Ah batteries offer a high capacity, while improved operating speed results from a revitalised hydraulic system with double speed action. A security valve assures operator safety. Designed with improved handling characteristics, B1300PL is easily manageable during the operating process.

PO7000

Foot operated double speed pump, developing a maximum pressure of 700 bar.

The pump is supplied with 3 m long high pressure flexible hose complete with female self-lock quick coupler.

Pressure can be withdrawn at any time during operation by depressing the release lever.

A solid shaped stand gives the pump stability during operation.

FEATURES

max operating pressure	700 bar
dimensions (LxWxH)	680 x 200 x 163 mm
weight	9.8 kg

MECHANICAL TOOLS

SC1

Electricians scissors with high tensile steel blades allowing for excellent strength and performance. Specially micro-serrated blades for anti-slip purpose. Handles are made from dual component materials.

APPLICATION

flexible conductors Cu - Al

SC5X

Professional scissors with special Steel frame, high hardness blades (58 HRC) and anti slide serrations. The moulded plastic handles combine a rigid structure with a softer material for finger comfort. Supplied with carry case and swivel belt hook.

APPLICATION

flexible conductors Cu - Al up to 50 mm²

SC3X

Multi-purpose scissors with high hardness blades (56 HRC) and anti slide serrations. The moulded plastic handles combine a rigid structure with a softer material for finger comfort. Cutting of flexible conductors up to 35 mm².

APPLICATION

flexible conductors Cu - Al up to 35 mm²

SC6X

Only 86 g weight, the tapered blades and streamlined handles encourage agility and speed of operation. Handles have an integrated crimping system for end sleeves. high hardness blades (58 HRC) and anti slide serrations.

SDC

Deep point socket

Hexagonal lever point

Reduced shank diameter

Socket screwdriver with deep execution and reduced wall equipped with an ergonomic handle, useful for use under stress. The reduced external wall allows the tool to be used in spaces with narrow seats (relays and switches). The deep groove sleeve can be used on long threads. The hexagonal insert on the outside of the bush facilitates effort in critical conditions.

Standard: ISO 6750 - ISO 2236

HEAT SHRINKABLE TUBING HIGH GRADE 3:1 DIESEL RESISTANT

Ladder and continuous, shrinkage ratio 3:1

TERMO-ROLL D3 heat shrinkable tubes are made of DIESEL RESISTANT heat shrinkable Polyolefin tubing with ideal printability properties for identification purpose, which provides fluid resistance as per NF-F00-608.

Ideal for applications where diesel resistance characteristics are required, as per ALSTOM and BOMBARDIER and other rolling stock application.

Material: Extruded, cross linked Polyolefin, shrinkage ratio 3:1

Temperature range: -40°C to +125°C

Minimum shrinkage temperature: > +90°C

HEAT SHRINKABLE TUBING HIGH GRADE 2:1

ladder & continuous, shrinkage ratio 2:1

H2 type heat shrinkable tubing is used to provide highly legible and resistant identification of cables, pipes, conduits, etc. within a minimum space.

Halogen Free composition provides flame retardant and low smoke emission characteristics suitable for safety critical applications including closed environments such as tunnels and subways, rail installations, marine and industrial applications.

Material: Irradiated Polyolefin, shrinkage ratio 2:1
Operating temperature range: -30°C to +105°C
Minimum shrinkage temperature: > +90°C

Resistance to liquids, after the shrinkage:
MIL-STD-202H
EN 50343-Annex H
LUL C3349
SAE AS-5942

Meets the requirements for fire testing of materials and components for trains in EN 45545-2 and NFPA 130.

IDENTIFICATION FOR RAILWAY APPLICATIONS

THERMAL TRANSFER LABELS

self adhesive, on a roll

Thermal transfer labels are made from materials which are not temperature sensitive and whose surfaces are treated to accept the pigment from the ribbon heated by the print head. Labels are normally die cut on a roll and arranged horizontally with respect to the printer output, although some are arranged vertically.

When not in use, labels will maintain their good condition if stored in their original packaging and not subject to excessive heat or significant temperature variation. They should be removed from their packaging only at the time of use and not exposed to moisture for long periods.

CONTINUOUS MATERIAL

for thermal transfer printing, on a roll

Continuous material is made from materials which are not temperature sensitive and whose surfaces are treated to accept the pigment from the ribbon heated by the print head. When not in use, labels will maintain their good condition if stored in their original packaging and not subject to excessive heat or significant temperature variation. They should be removed from their packaging only at the time of use and not exposed to moisture for long periods.

TIME/COST EFFECTIVE PRODUCTION: no warm up, easy loading/unloading of media. Printing cost is not dependent on print density. Each monochrome ribbon can print more than 300,000 MG-TPMF 4x10 mm cable tags

FAST: 10 second print cycle, quality checked by the operator
CLEAN AND QUIET: produces no fumes or residue and may be conveniently located in an office

PORTABLE AND RUGGED: unaffected by environmental changes or relocation, suited for on-site application

READY TO USE: dry resin ribbon is clean to touch so printed media are immediately ready to use

IDENTIFICATION FOR RAILWAY APPLICATIONS

CABLE TAGS FOR HOLDERS

precut 4mm push in markers, easy entry for PMF holders

SerieFLAT **MG-TPMF** tags are used for marking cables, conduit, tubes, conductors and components.

Presented in stem format, tags are simply snapped off their stems and inserted into the appropriate holders. Consult us for other colours.

Note: UV resistance may vary between colours.

Material: Rigid PVC, self extinguishing class V0 according to UL94; the colours white PVC10050WH and yellow PVC10050YE are UL approved.

Operating temperature range: -30°C to +60°C

WRAPAROUND CABLE MARKERS

self adhesive, precut

MG-KMP wraparound cable markers are suitable for identifying large diameter cables, tubes and conduit.

MARKINGENIUS® printing is exceptionally clear and legible and is protected from chemical and atmospheric agents.

Material: Polyolefin PO99006TR, Silicon free, Halogen free, certified UL969.

Operating temperature range: -70°C to +140°C

Application temperature range: +10°C to +40°C

CABLE TAGS WITHOUT HOLDER

MG-TDM one piece tags require no transparent holders and are mounted on cables via the two range-taking apertures.

MG-TDMO one piece tags require no transparent holders and are mounted on cables via the two range-taking apertures.

Tags are easily removed from the stems and partially printed sheets may be reused to avoid wastage.

Material: Polycarbonate, Halogen Free, Silicon free, self extinguishing class V0 according to UL94; the colours white PC10200WH and yellow PC10400YE are EN 45545-2 approved.

CABLE & CONDUIT TAGS TIE-ON

precut, one piece markers

MG-ETF tags are used with cable ties for marking large diameter cables, hoses, tubes and conduit.

Consult us for availability of other colours.

Note: UV resistance may vary between colours.

Cable tie max width 4,8 mm.

MG-ETF-SBS

TERMINAL BLOCKS MARKERS

MG-CPM terminal block markers are available in versions to suit the particular clip formats of the most widely used products. Depending on type, markers are presented as joined strips at a set or flexible pitch or as separate markers for convenient individual insertion on mixed pitch terminal block assemblies.

Material: Polycarbonate, self extinguishing class V0: according to UL94; the colours white PC10200WH, PC10300WH and yellow PC10400YE are EN 45545-2 approved.

Operating temperature range: -40°C to +130°C

STAINLESS STEEL TIE-ON TAGS TO AGGRESSIVE ENVIRONMENTS

Stainless Steel tie-on tags for the identification of cables, wiring and ducts in arduous applications such as: offshore platforms, shipbuilding, mining, underground, petrochemical, floating units for the production, storage and unloading of oil, refineries, railway infrastructure, food industry, solar field and, in general, where high resistance to aggressive environments is essential.

Material: AISI 316L Stainless steel
Operating temperature range:
 up to +800°C (continuous)
 up to +850°C (short periods)

Size mm	N° text lines	N° characters per lines	Max numbers of characters	Type	Metal tie max width mm	Quantity

STAINLESS STEEL CABLE TIES

Unique ball locking mechanism that allows simple and rapid installation and secure locking.
 High tensile strength.
 Non flammability.

Material: AISI 304 Stainless Steel
 High resistance to Acetic Acid, Alkalise, Sulphuric Acid, Corrosion, etc. In general very resistant to most hostile environments.
Operating temperature range: -80°C to +500°C

consult the online catalogue for other identification products

It is advisable to select the holder size based on the actual external diameter of the cable rather than its indicative c.s.a, due to variations in insulation thickness and conductor format. Consult us for holders in other lengths. Use holders only with designated cable tags of the same length.

TRANSPARENT TAG HOLDERS

for serieFLAT cable tags 4 mm

PMF holders are specifically designed to accommodate pairs of appropriately sized cables.

Material: plasticised PVC, self extinguishing to class V0 according to UL94, free of Cadmium, Lead, Silicon and Teflon. Resistant to Alkali, Alcohol, Acid and many Solvents.

Operating temperature range: -40°C to +80°C

PUSH BUTTON LEGEND BASES

for \varnothing 22,5 mm manual operators

\varnothing 22.5 mm black push button legend bases to fit a wide range of popular brands.

All types have a hole behind the legend for rivet fixing, while PTP...A types are adhesive backed.

All types suit MG-TAP 15x27 mm legends and can be fitted with a transparent legend cover TAP-CCS 990521 or MG-TAP-HF 990510.

Material: Polycarbonate, self extinguishing class V0 according to UL 94

Operating temperature range:

-40°C to +115°C (continuous)

-40°C to +130°C (short periods)

A wide range of self adhesive signs, in various types and formats, for comprehensive signing of all potentially hazardous situations in factories, workshops and industrial premises.

Material: Polyester film over-laminated with transparent film resistant to UV, thickness approximately 0,1 mm. Resistant to Water, Oil, Grease, Alcohol, Detergent, Alkaline Substances and Atmospheric Agents. Low flammability, self extinguishing. Recommended for application to equipment for internal or external use, but not directly exposed to atmospheric agents. If exposed to atmospheric agents, the life of the label may be limited to five years.

Application temperature range: -40°C to +130°C

1. GENERAL TERMS

- 1.1 For the purpose of these GENERAL TERMS AND CONDITIONS OF SALE (the "Terms and Conditions"), the following definitions shall apply:
 - «(Seller): CEMBRE S.p.A. and its affiliates;
 - «(Affiliate): any entity directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with CEMBRE S.p.A.;
 - «(Buyer): any professional or entrepreneur purchasing the Products from the Seller;
 - «(Products): the goods manufactured and/or sold by the Seller;
 - «(Order(s)): each proposal for the purchase of the Products submitted by the Buyer to the Seller in writing;
 - «(Sale(s)): each single sale agreement entered into further to the receipt by the Buyer of the written order confirmation of the Seller.
- 1.2 These Terms and Conditions govern the sale of equipment, components, parts, and materials (the "Products") supplied by the Seller to the Buyer. Any specific supply agreement, order confirmation, quotation, these Terms and Conditions and the purchase order form the Sales Agreement ("Agreement") between the parties. In the event of a conflict between these documents, precedence shall apply in accordance with the order listed in the previous sentence.
- 1.3 CEMBRE's quotation, proposal or order confirmation is conditional on the Buyer's acceptance of these Terms and Conditions. Buyer's silence or acceptance/use of the Products or services related to any purchase order shall constitute tacit approval of these Terms and Conditions.
- 1.4 Any additional or conflicting terms included in the Buyer's request for quotation/proposal, specifications, purchase order or any other written or oral communication are not binding on CEMBRE unless separately signed by CEMBRE. CEMBRE's failure to object to Buyer's additional or conflicting terms (including the Buyer's Terms and Conditions of Purchase) does not operate as a waiver of any terms contained herein.

2. ORDERING PROCEDURES

- 2.1 Offers of the Seller are not binding. This shall also apply if the Seller has provided the Buyer with catalogs, technical documentation (e.g. drawings, plans, calculations, calculations, references to DIN standards), other product descriptions or documents - also in electronic form - to which the Seller reserves property rights and copyrights pursuant to Clause 8.
- 2.2 Unless otherwise agreed, the information in offers and order confirmations shall refer to the contents of the respectively valid price lists, catalogs or other documents - also in electronic form, including technical data sheets, of the Seller.
- 2.3 All orders must be sent in writing and include all the details for a correct identification of the Products and Services requested. The minimum order amount is € 250.
- 2.4 The order is an irrevocable proposal to buy, but it is accepted by the Seller only following order acknowledgement / confirmation or execution.
- 2.5 The Buyer may request in writing to cancel or modify the order only prior to its execution and the Seller may at its own discretion accept or reject such request. Only cancellations and modifications expressly accepted by the Seller in writing shall be valid and effective.

3. PRICING AND PAYMENT TERMS

- 3.1 Unless otherwise specified in writing, Seller's quotations have a 30-day validity, after which they will automatically expire.
- 3.2 Prices quoted in price-lists and marketing materials are not binding and cannot be considered a "public offer". Unless otherwise agreed in writing, prices are always quoted based on delivery term FCA (Incoterms latest version) net of any applicable statutory value added /goods and services tax and of any applicable taxes and duties.
- 3.3 The Seller reserves the right to update the price-list without prior notice; the new release of the price-list will apply to all the Orders placed after the date such new release is issued and sent to the Buyer. Invoices will be issued in accordance with the prices in force on the date of the order confirmation or as otherwise agreed in specific supply agreements.
- 3.4 In the event of late payment, the Seller will have the right to charge overdue interest in accordance with the provisions of law no. 231/2002. Any further claim for damages caused by delay shall remain unaffected.
- 3.5 In the event of payment arrears, suspension of payments and if circumstances become known which are likely to reduce the creditworthiness of the customer, the Seller shall be entitled, after having granted a period of grace, to declare all claims arising from the entire business relationship with the customer immediately due for payment. Discount agreements, rebates and the like shall be deemed forfeited in this case.
- 3.6 Failure to pay or delayed payments above 30 days also entitle the Seller to suspend the delivery of the Products and terminate every single Sale entered into. The suspension of the delivery of the Products or the termination of any Sale shall not entitle the Buyer to claim for any compensation.
- 3.7 Any complaints regarding the Products and/or their delivery shall not be grounds for suspending or delaying the payment.
- 3.8 In the event of default or risk of insolvency concerning the Buyer, the Seller will be entitled to:
 - demand payment in advance or suitable guarantees; and/or
 - suspend deliveries; and/or
 - demand immediate payment of all the invoices already issued, regardless of the payment term therein indicated; and/or
 - terminate any existing sale agreement.

4. DELIVERY

- 4.1 Except as otherwise agreed upon in writing between the parties, the Seller shall deliver the Products FCA its premises (INCOTERMS latest version). If required, the Seller shall take care of the shipment of the Products at the Buyer's costs and expenses. In this last case delivery shall be considered to have taken place when the Products are transferred to the forwarder.
- 4.2 In case of missing or damaged goods during transport, the Buyer must formulate all the necessary reservations on the delivery note of said goods at the time of delivery. Such reservations must also be confirmed in writing to the Seller within 48 hours of the date of the delivery, by registered mail with return receipt.
- 4.3 The Seller cannot be held liable for delays in deliveries in the following circumstances:
 - acts of God or other extraordinary events beyond reasonable control, resulting in interruption of the manufacturing process, including shortage of energy and/or raw materials, pandemics strikes, embargoes or trade restrictions;
 - delays due to the Buyer, particularly when the Buyer failed to provide the information required to execute the order;
 - overdue payments, pursuant to arts. 1460 and 1461 of the Civil Code.
- 4.4 Penalties for late delivery may be charged by the Buyer only when expressly agreed in a specific supply agreement, and in any case up to a maximum amount equal to the price of the delayed delivery.
- 4.5 The Buyer shall not reject partial deliveries or late deliveries. All costs resulting from the rejection of goods will be charged to the Buyer. Excess deliveries for the purpose of rounding up to the packing quantity shall be deemed to be contractual performance and shall be paid by Buyer.

- 4.6 Goods returned at the request of the Buyer can only be accepted if the Seller has agreed in writing. The returned parts must be in their original packaging, come from the current product range and be in saleable condition. The return shipment must be carriage paid and at the risk of the Buyer. From the purchase price to be refunded, a depreciation fee will be deducted based on the actual conditions of the goods, their age and original price. Depreciation shall not apply to goods returned under section 5 and 6 hereinafter, provided that the return was authorized by the Seller. Custom-made products or articles which are not included in the current catalogue will not be taken back. Returned goods that are not accepted by the Seller will be shipped back to Buyer or scrapped at the Buyer's choice (freight paid by the Buyer).
- 4.7 In the event of modifications to the order required by the Buyer, the delivery deadline will automatically be extended for the time necessary to implement the required modification.

5. CONFORMITY

- 5.1 Complaints about apparent defects or non-conformity of the product delivered in relation to the purchase order or the packing slip must be notified to the Seller in writing within 48 hours after receipt of the products, subject to forfeiture. The Buyer loses the right to claim if the goods are not inspected immediately after delivery.
- 5.2 In the absence of a specific agreement on quality, the features contained in a specification, a product-specific technical data sheet or an equivalent description by the Seller shall be deemed to be the relevant quality. Insignificant deviations shall not constitute a defect.

6. WARRANTY AND LIABILITY

- 6.1 Unless otherwise agreed upon in writing, the Seller warrants that the Products are free from defects in material, design and manufacturing and fit for use. No guarantee is given herein by the Seller on the conformity of any Product with the law and regulations in countries outside EU and the UK. No other warranties, express or implied, are made with respect to the Products including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose.
- 6.2 Unless otherwise agreed upon in writing, the warranty shall be valid for a period of one year from the date of delivery to the Buyer. Warranty is provided only on tools or machines with a serial number or other identification number that allows traceability. The warranty is, however, excluded if the Products have already been processed by the Buyer or incorporated in products, machinery or plants of the Buyer or of third parties.
- 6.3 Claims for defective Products shall be made in writing within eight working days from discovery.
- 6.4 The defective Products shall be returned to the Seller at the Buyer's cost upon Seller's request. The Seller's sole obligation (and Buyer's sole remedy) for any breach of warranty under the foregoing warranty shall be to repair (at location designated by Seller) or replace DAP the original point of delivery the defective goods, within a reasonable time. The Buyer will waive any claim for damage compensation once the warranty has been fulfilled and the Product has been repaired or replaced. The warranty shall not cover defects due to environmental or stress testing, misuse, failure to observe the Seller's instructions regarding the functioning, maintenance and the storage of the Products, repairs or modifications made by the Buyer or a third party without prior written authorization of the Seller, improper installation, transportation or handling.
- 6.5 Direct interventions on site are not included in the warranty; if expressly requested by the Buyer they are subject to charge, according to the Seller's tariffs.
- 6.6 Warranty repair/replacements may be suspended in the event of insolvency of the Buyer or overdue invoices.
- 6.7 Save for the case of fraud or gross negligence, the Seller shall bear no liability for damages to property or third parties other than that expressly provided by virtue of any mandatory law provisions. In any case, the Seller shall not be liable for indirect or consequential damages of whatsoever nature as, by way of example, production losses or unearned profits. In any case, Buyer's right to damages shall be limited to a maximum amount equal to the value of the Products showing defects or faults.
- 6.8 The Seller shall bear no liability for damages to property or third parties other than that expressly provided by virtue of any mandatory law provisions. The Seller will not, under any circumstances, be liable for the cost of removal or reinstallation of goods or the cost of disassembly or reassembly or for loss of business or goodwill or profits or for cost of inspection or storage or for any incidental and consequential damages of any nature which may arise from the sale of goods to the Buyer. When liability cannot be excluded by virtue of mandatory law provisions, Buyer's right to damages shall in any case be limited to a maximum amount equal to the value of the Products showing defects or faults.
- 6.9 The Seller has taken out suitable insurance policies covering general liability in connection with the Products.

7. EXPORT CONTROL REGULATIONS

- 7.1 CEMBRE shall not be obligated to fulfil this agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions or restrictions.
- 7.2 If the Buyer transfers the goods to a third party, the Buyer shall comply with all applicable national and international (re-) export control regulations.
- 7.3 The Buyer shall cooperate with the Seller to provide the information concerning end users, destination and intended use of goods supplied by CEMBRE, in case this is necessary due to customs control activities or export control regulations.
- 7.4 Violations of this section 7 shall entitle the Seller to terminate any existing sale agreement at any time without notice.

8. INTELLECTUAL PROPERTY, CONFIDENTIALITY AND PRIVACY

- 8.1 The use of CEMBRE trademarks is governed by the General Terms and Conditions, published on the website <https://www.cembre.com/group/termsandconditions>, which the Buyer is obliged to comply with. It is prohibited to relabel and repackage the Products without CEMBRE's written authorization.
- 8.2 Each party will retain ownership of its Intellectual Property developed before or outside the scope of the sale agreement. If any Intellectual Property is developed under the sale agreement, the parties shall execute a separate agreement regarding the ownership thereof.
- 8.3 Seller expressly reserves the copyright to its catalogues, technical documentation (e.g. drawings, plans, calculations, data sheets), other product descriptions or documents - also in electronic form. The Buyer is only granted a non-exclusive right of use.
- 8.4 All drawings and technical documents relating to the Products submitted by one party to the other shall remain exclusive property of the submitting party and can only be used for the purpose for which they were provided. The receiving party is not allowed to use such documents otherwise, to procure copies thereof, to reproduce and to disclose them to a third party without consent of the submitting party. The end user of the Products shall not be deemed as a third party for the purpose of this section.
- 8.5 Any liability of the Seller is excluded if the Buyer is responsible for the infringement of property rights, in particular because he has modified the object of performance, used it in breach of contract or taken it to a place other than the place of destination without the Seller's consent.

- 8.6 If the Seller manufactures goods according to drawings, samples or other information provided by the Buyer (OEM products) and if the property rights of third parties are infringed in the process, the Buyer shall indemnify the Seller from all claims for damages resulting from this.
- 8.7 The Seller warrants that the personal data received from the Buyer will be processed in full compliance with the applicable data protection regulations.
- 8.8 Violations of this section 8 shall entitle the Seller to terminate any existing sale agreement at any time without notice.

9. APPLICABLE LAW AND JURISDICTION

- 9.1 The place of performance for the delivery together with any subsequent performance on the part of the Seller is the Seller's registered office.
- 9.2 Place of jurisdiction is the registered office of the Seller. The Seller is also entitled to take legal action at the Buyer's registered office.
- 9.3 The legal relations between the Seller and the Buyer shall be governed by Italian law to the exclusion of the U.N. Convention on the International Sale of Goods (CISG).
- 9.4 The Buyer acknowledges that the CEMBRE Group has adopted a Code of Ethics and undertakes to respect its provisions, abstaining from any unlawful conducts. Failure to comply with any of the provisions of the Code of Ethics will result in a serious breach of contractual obligations and will entitle CEMBRE to terminate the contract with immediate effect, without prejudice to compensation for damages.

10. FORCE MAJEURE AND HARDSHIP

- 10.1 No failure, omission or delay of the Seller in the performance of any obligation shall be deemed a breach of the agreement nor create any liability hereunder, if the failure, omission or delay shall arise from acts of God, laws, rules, regulations or orders of any governmental authority, floods, fires, explosions, storms, earthquakes, acts of war (declared or undeclared), rebellion, insurrections, riot, sabotage, shortages of fuel, power, energy resources, and/or raw material, invasion, epidemic, quarantine, accident, strikes, lockouts, labor disputes, or any other comparable cause beyond the reasonable control of the Seller.
- 10.2 If, during the term of the contract, events occur which have not been contemplated by the Parties and which fundamentally alter the equilibrium of the contract, thereby placing an excessive burden on the Seller in the performance of its contractual obligations (hardship), the Seller shall have the power to make any revision to the contract that it finds just and equitable in the circumstances, or to terminate the contract at a date and on terms to be fixed.

A large area of the page is filled with horizontal dotted lines, providing a space for writing notes. The lines are evenly spaced and extend across most of the page width.
